

| | | |
|----|---------------------------|--------------------------------------|
| 1. | Nazwa kierunku | biofizyka |
| 2. | Wydział | Wydział Nauk Ścisłych i Technicznych |
| 3. | Cykl rozpoczęcia | 2021/2022 (semestr zimowy) |
| 4. | Poziom kształcenia | studia drugiego stopnia |
| 5. | Profil kształcenia | ogólnoakademicki |
| 6. | Forma prowadzenia studiów | stacjonarna |

Moduł kształcenia: Machine Learning with Neural Networks

Kod modułu: W4-2BF-MB-21-17

1. Liczba punktów ECTS: 4

| 2. Zakładane efekty uczenia się modułu | | | |
|--|--|-----------------------------|--------------------------------|
| kod | opis | efekty uczenia się kierunku | stopień realizacji (skala 1-5) |
| MB_17_1 | students will be able to state the fundamental problem and complexity of Machine Learning, and acquire a global view of the different Machine Learning techniques | KBF_K10 | 3 |
| | | KBF_U02 | 3 |
| | | KBF_U11 | 4 |
| | | KBF_U14 | 5 |
| | | KBF_W02 | 4 |
| MB_17_2 | students will be able to understand and explain classical models of Neural Networks such as the Hopfield networks, Boltzmann Machines, Single- and Multi-layer Perceptrons, and Convolutional networks | KBF_K10 | 3 |
| | | KBF_U02 | 3 |
| | | KBF_U11 | 4 |
| | | KBF_U14 | 5 |
| | | KBF_W02 | 4 |
| MB_17_3 | students will be able to implement the standard training techniques in these models, and put them in relation with the issue of the Deep Learning and its solution techniques | KBF_K10 | 3 |
| | | KBF_U02 | 3 |
| | | KBF_U11 | 4 |
| | | KBF_U14 | 5 |
| | | KBF_W02 | 4 |

3. Opis modułu

| | |
|------|--|
| Opis | |
|------|--|

| | |
|--------------------------|--|
| | Course syllabus: (1) Introduction to Machine Learning (fundamental problem and its inherent complexity; general approaches for its solution) (2) Classic Neural Networks models (Hopfield model; recurrent Boltzmann Machines (BM) and Restricted Boltzmann Machines (RBM); learning with BM y RBM: gradient descent, Contrastive Divergence and its variants; single-layer perceptrons (SLP): lineal and logistic regression, Rosenblat perceptron; multi-layer perceptrons (MLP): learning with MLP, back-propagation; Convolutional Neural Networks (CNN): model, link to MLP, and learning) (3) Deep Learning: link with classical models and modern learning techniques. |
| Wymagania wstępne | |

| 4. Sposoby weryfikacji efektów uczenia się modułu | | | |
|--|--------------------|--|----------------------------------|
| kod | nazwa (typ) | opis | efekty uczenia się modułu |
| MB_17_w_1 | zaliczenie | The final mark for this course is computed as $0.2 \cdot M_1 + 0.2 \cdot M_2 + 0.6 \cdot M_3$, where M_n is the grade of each practical homework. For the latter, the students will be provided with a code structure, and they will have to implement specific functions and run virtual experiments in which different machine learning strategies will be employed | MB_17_1, MB_17_2, MB_17_3 |

| 5. Rodzaje prowadzonych zajęć | | | | | | |
|--------------------------------------|----------------------------------|--|----------------------|--|----------------------|--|
| kod | rodzaj prowadzonych zajęć | | | praca własna studenta | | sposoby weryfikacji efektów uczenia się |
| | nazwa | opis (z uwzględnieniem metod dydaktycznych) | liczba godzin | opis | liczba godzin | |
| MB_17_fs_1 | wykład | Detailed discussion by the lecturer of the issues listed in the table "module description" using the table and/or multimedia presentations | 26 | Supplementary reading, working with the textbook | 44 | MB_17_w_1 |
| MB_17_fs_2 | laboratorium | Computer sessions | 10 | | 20 | MB_17_w_1 |
