Module name	**Fundamentals of device design in CAD systems**
Module code	08-IBPR-S1-20-5-PPUS
Number of the ECTS credits	4
Language of instruction	Polish
Purpose and description of the content of education	Celem zajęć prowadzonych w ramach modułu :Podstawy projektowania urządzeń w systemach CAD" jest zapoznanie studentów z praktycznymi możliwościami tworzenia złożonych układów mechanicznych. Studenci zapoznani zostaną z zasadami tworzenia złożeń, dobierania wiązań i definiowania relacji między komponentami będącymi składowymi elementami układów. Głównym narzędziem pracy będzie oprogramowanie Solidworks z modułem Motion. Zajęcia opierać się będą na szczegółowym zapoznaniu z metodami i narzędziami dostępnymi w oprogramowaniu, określaniu zasad ich doboru i konfigurowania opcji. Przy wsparciu nauczyciela student będzie realizował zadania, których efektem będą gotowe układy mechaniczne, umożliwiające symulację i odzwierciedlenie jego zasady działania.

9.	Methods of conducting classes	
Code	**Category**	**Name (description)**
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture *a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided*
a03	Lecture methods / expository methods	Description *a description of objects, phenomena, processes or people; it involves specifying the structure and characteristic features of the object, phenomenon, or process being described; it is usually accompanied by a demonstration of the described object or by its models, drawings, tables, charts, etc.; a description may take the form of an explanation, classification, justification or comparison*
c06	Demonstration methods	Demonstration-imitation *a presentation of a model way of performing specific activities accompanied by a commentary; it aims at triggering imitation activities in an individual or in a group of participants observing the activities of the person teaching the course until the right habit is formed through regular exercise; the demonstration-imitation method is combined with a physical practice of activities/behaviours*
d01	Programmed learning methods	Working with a computer *e.g., Webquest; implementation of educational tasks using electronic and digital devices, computer programs and Internet applications; the academic teacher acts as a consultant; students' work is carried out step by step according to the plan laid own by the person teaching the course and following his instructions, and proceeds towards producing the indicated results within the set deadline*
d03	Programmed learning methods	Working with another teaching tool *e.g. using websites in any way or according to the rules set by the teacher; or making use of other subject-specific tools*
