

1.	Field of study	Biophysics
2.	Faculty	Faculty of Science and Technology
3.	Academic year of entry	2023/2024 (winter term), 2024/2025 (winter term)
4.	Level of qualifications/degree	first-cycle studies
5.	Degree profile	general academic
6.	Mode of study	full-time

7.	General information about the module					
Module name		Molecular Genetics				
Mod	lule code	W4-BF-S1-3-23-17				
Nur	nber of the ECTS credits	5				
Lan	guage of instruction	Polish				
	pose and description of the ent of education	The Molecular Genetics module aims to introduce students to the fundamentals of molecular genetics in the context of how organisms, tissues and cells function. The module extends and consolidates knowledge of the organisation of the genome, the processes of DNA replication and repair, and the concept of the central dogma of molecular biology. Students are familiarised with the basic techniques of molecular biology and learn their practical application in the study of biological systems.				
con	of modules that must be pleted before starting this lule (if necessary)	not applicable				

8. Learning	outcomes of the module		
Code	Description	Learning outcomes of the programme	Level of competent (scale 1-5)
E1	The student knows and understands the key issues of molecular genetics and its applications.	W04	1
E2	The student has a basic knowledge of the structure and function of nucleic acids, the transfer of genetic information and sources of variation among organisms.	U02 W02	1 1
E3	The student is familiar with the basic techniques used in molecular biology, using restriction enzymes, ligases, PCR reactions and DNA sequencing.	W07	1
E4	The student can carry out the experiment correctly, document and present the results of the determinations and present their interpretation.	U04 U07	1 1
E5	The student knows and understands the principles of laboratory work, takes care of safety and hygiene in the biological laboratory, and conscientiously analyses experimental data.	U10 W10	1 1

9. Methods of o	Methods of conducting classes		
Code	Category	Name (description)	
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a	

	passive reception of the information provided
e01	Laboratory exercise / experiment [also conducted as fieldwork] a method of practical application of knowledge; implemented in three stages: the recognition of a problem induced by the task content, the formulation of the problem and the attempt to solve it accompanied by the assessment of the effects; the goal is to acquire skills, abilities and habits, and to consolidate the acquired knowledge so that it becomes operational; the laboratory method assumes greater independence of learners than carrying out an experiment

10. Forms of teach	Forms of teaching				
Code	Name			Learning outcomes of the module	Methods of conducting classes
FZ1	lecture	30	exam	E1, E2, E3	a01
FZ2	laboratory classes	30	course work	E4, E5	e01

11. The student'	L. The student's work, apart from participation in classes, includes in particular:			
Code	Category	Name (description)	Is it part of the BUNA?	
a02	Preparation for classes	Literature reading / analysis of source materials reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class	Yes	
a03	Preparation for classes	Developing practical skills activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)	Yes	
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content reading through the syllabus and getting acquainted with its content	No	
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class	No	
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/examination completion a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course	Yes	
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes	No	

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: https://usosweb.us.edu.pl.
