

1.	<b>Field of study</b>	<b>Biophysics</b>
2.	Faculty	Faculty of Science and Technology
3.	Academic year of entry	2023/2024 (winter term), 2024/2025 (winter term)
4.	Level of qualifications/degree	first-cycle studies
5.	Degree profile	general academic
6.	Mode of study	full-time

<b>7. General information about the module</b>	
<b>Module name</b>	<b>Physical Methods in Biophysics II</b>
Module code	W4-BF-S1-6-23-25
Number of the ECTS credits	4
Language of instruction	Polish
Purpose and description of the content of education	The main objective of the module is to expand students' knowledge of modern experimental methods used in molecular biophysics. Individual lectures are correlated with laboratory classes conducted in research laboratories. Laboratory exercises involve students performing experiments and analyzing them. This will allow them to practically familiarize themselves with specialized research equipment for studying the structure and composition of substances, biological tissues, and organisms and enable them to observe the course and dynamics of molecular processes in biological systems.
List of modules that must be completed before starting this module (if necessary)	not applicable

<b>8. Learning outcomes of the module</b>			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)
E1	The student knows the fundamental laws and formulas from selected branches of experimental physics necessary to understand the principles of operation of the research instruments used and to determine the scope of their applications in studying biological substances.	U01 W02 W06	1 1 1
E2	The student knows and understands the basic physical phenomena occurring in nature, the methods of their description and the use of physical research to explain the structure of organisms and the phenomena occurring in them.	U02 W01 W03 W05	1 1 1 1
E3	The student has an expanded knowledge of the experimental methods used in biophysics, is able to conduct an experiment, analyze the data obtained and prepare a report on the research.	U03 U04 U05 U06 W06 W07	1 1 1 1 1 1

		W08	1
E4	The student has the ability to work in a team, estimate the time and resources needed to complete the assigned task, understand the division of tasks and the need to fulfill the assigned task.	K04 U10	1 1
E5	The student can obtain information from literature, databases and other sources to correctly interpret obtained results and to draw and formulate conclusions about the structure and properties of matter.	K02 U08	1 1

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
a05	Lecture methods / expository methods	Explanation/clarification <i>explication involving the derivation of a predetermined theorem from other, already known ones, in the number of steps specified by the person teaching the course</i>
e01	Practical methods	Laboratory exercise / experiment <i>[also conducted as fieldwork] a method of practical application of knowledge; implemented in three stages: the recognition of a problem induced by the task content, the formulation of the problem and the attempt to solve it accompanied by the assessment of the effects; the goal is to acquire skills, abilities and habits, and to consolidate the acquired knowledge so that it becomes operational; the laboratory method assumes greater independence of learners than carrying out an experiment</i>

10. Forms of teaching					
Code	Name	Number of hours	Assessment of the learning outcomes of the module	Learning outcomes of the module	Methods of conducting classes
FZ1	lecture	30	course work	E2, E5	a01
FZ2	laboratory classes	30	course work	E1, E3, E4	a05, e01

11. The student's work, apart from participation in classes, includes in particular:			
Code	Category	Name (description)	Is it part of the BUNA?
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>	No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>	Yes
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>	No
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	Yes

d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	No
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.
