**Module:** Algorithmics and Advanced Data Structures

**Module code:** W4-IN-N2-20-1-AiZSD

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Has knowledge in the field of advanced methods of determining the computational complexity of algorithms. Knows and understands classes of algorithms complexity.	K_W01 K_W04	2 2
M_002	Has knowledge in the field of advanced paradigms of algorithms constructing, among others: exhaustive search, greedy strategies. Knows and understands basics of operation and advantages and disadvantages of these algorithms.	K_W04	4
M_003	Has knowledge in the field of graph algorithms.	K_W01 K_W04	1 3
M_004	Knows the concept of approximation algorithm and examples of such algorithms using different approaches, e.g. combinatorial or based on the theory of linear programming.	K_W01 K_W04	1 3
M_005	Knows examples of Monte-Carlo and Las-Vegas randomized algorithms.	K_W01 K_W04	1 3
M_006	Can designate computational complexity of recurrent algorithms and record their complexity, e.g. in the form of recurrent equation and solve such an equation.	K_W01 K_W04	2 2
M_007	Can choose and implement an appropriate, basic or advanced paradigm of algorithm construction for solution of a given problem. Can justify his choice.	K_U08 K_U09	1 3
M_008	Is able to implement an appropriate algorithm to solve a given problem, as well as select the appropriate data structure.	K_U09	3
M_009	Is aware of substantial importance of algorithm features (complexity, correctness) on the basis of which the components (modules, functions, procedures) of bigger software systems are built on final efficiency, correctness of operation and security of these systems.	K_K01 K_U09	1 2

### 3. Module description

<b>Description</b>	Algorithmics is the science of algorithms. It includes algorithm design, i.e. the art of building a schema that effectively solves a specific problem or class of problems as well as algorithm analysis. The purpose of this module is to introduce the listener to advanced methods of algorithm design and issues of analysis of algorithms as well as data structures.
<b>Prerequisites</b>	

### 4. Assessment of the learning outcomes of the module

code	type	description	learning outcomes of the module
W_001	Written exam	Verification of knowledge basing on content presented during lectures.	M_001, M_002, M_003, M_004, M_005, M_006, M_009
W_002	Reports	Solving assigned tasks and elaborating them in the form of reports.	M_006, M_007, M_008, M_009

### 5. Forms of teaching

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Presenting educational content with use of audio-visual aids and other written education aids. Focusing on issues difficult to understand and these with deeper theoretical bases. Elicitation of students by asking questions concerning presented content.	20	Exam preparation.	40	W_001
Z_002	laboratory classes	Detailed preparation of the students for solving tasks indicating proceeding methodology and proceedings sequence.	20	Individual solution of tasks given during the laboratory class, elaboration of reports.	40	W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies

5. Degree profile	general academic
6. Mode of study	part-time

**Module:** cluster analysis algorithms in applications

**Module code:** W4-IN-N2-20-F-AASwP

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Is aware of the advantages of grouping algorithms and their impact on learning the analyzed data and their fields.	K_K02	1
M_002	Has knowledge of the basics of data mining, including data types, measures of similarity, methods for determining cluster representatives	K_W01 K_W02 K_W04 K_W09	2 2 2 3
M_003	Has knowledge of partitioning grouping algorithms, including k-means and k-medoids	K_W04 K_W09	2 3
M_004	Has knowledge of hierarchical grouping algorithms including AHC	K_W04 K_W09	2 3
M_005	Can determine the similarity / distance of objects relative to each other in multidimensional space	K_U01 K_U03 K_U08 K_U09	2 2 2 3
M_006	Is able to implement or use ready-made libraries / packages that allow the use of a split algorithm for any real data set	K_U01 K_U03 K_U08 K_U09	1 2 2 3

M_007	Is able to appoint a representative of a group of objects in multidimensional space	K_U01 K_U03 K_U08 K_U09	2 3 2 4
M_008	Can visualize the received structure of groups and interpret it correctly	K_U01 K_U03 K_U08 K_U09	1 2 1 3

### 3. Module description

<b>Description</b>	The goal is to introduce the listener to cluster analysis algorithms, both division, hierarchical, density and new cluster analysis algorithms. Their practical use in medicine will be considered.
<b>Prerequisites</b>	

### 4. Assessment of the learning outcomes of the module

code	type	description	learning outcomes of the module
W_001	exam (test)	Knowledge verification based on the content presented in the lecture. The exam consists of both open and closed theory questions.	M_001, M_002, M_003, M_004, M_005, M_006, M_007, M_008
W_002	Projects and reports	Developing projects with reports for them within a specified period as a verification of the skills acquired in solving problems.	M_001, M_005, M_006, M_007, M_008

### 5. Forms of teaching

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Transferring the content of education in verbal form using audiovisual means and other written teaching aids.	15	Preparation for the exam.	15	W_001
Z_002	laboratory classes	Detailed preparation of students to solve tasks with an indication of the methodology of the procedure, an indication of the order of performed activities.	30	Preparation for the laboratory. Student's independent solution of tasks assigned to the laboratory, preparation of reports	60	W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Computational intelligence techniques

**Module code:** W4-IN-N2-20-F-TIO

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
code	description	learning outcomes of the programme	level of competence (scale 1-5)
M_001	Knows advanced metaheuristics and their applications in selected optimization problems.	K_W01 K_W02	1 1
M_002	Is able to select a method to solve a presented optimization problem	K_U01 K_U05	1 1
M_003	Can write a program that implements a selected metaheuristics for the purpose of optimization calculations	K_U02 K_U03 K_U04	1 1 1
M_004	Understands the need to develop decision-making methods for optimisation problems	K_K01	1

<b>3. Module description</b>	
<b>Description</b>	The metaheuristic algorithm can be used to solve any problem that can be described with some terms defined by the algorithm. However, it is most often used to solve optimization problems. A disadvantage of metaheuristic algorithms is the fact that they do not guarantee finding a solution and, moreover, usually it is not possible to give the time of their operation. The effectiveness of metaheuristics also depends largely on the parameters that appear in such algorithms. Unfortunately, there are no universal values of these parameters that behave best for all possible input data.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
<b>code</b>	<b>type</b>	<b>description</b>	<b>learning outcomes of the module</b>
W_001	Colloquium	Written work on the description of existing techniques and their adaptation to selected optimization problems.	M_001
W_002	Presentation of the programme related to the implemented project.	Presentation of the program and verification of its effectiveness for the selected optimization problem.	M_001, M_002, M_003
W_003	Preparation of the multimedia presentation	Presentation of advantages and disadvantages of the selected computational intelligence technique and its verification on a specific optimization problem	M_001, M_002, M_004

<b>5. Forms of teaching</b>						
<b>code</b>	<b>form of teaching</b>			<b>required hours of student's own work</b>		<b>assessment of the learning outcomes of the module</b>
	<b>type</b>	<b>description (including teaching methods)</b>	<b>number of hours</b>	<b>description</b>	<b>number of hours</b>	
Z_001	lecture	Giving the educational content in verbal form with the use of content visualization. Focusing on conceptually difficult material and indicating addresses of websites and e-learning package	15	Getting to know the topic of the lecture using the existing packages of methods: script, websites and e-learning package	30	W_001
Z_002	laboratory classes	Detailed preparation of students for the implementation of algorithms with indication of the methodology of conduct, indication of the sequence of activities to be performed	30	Self-development and preparation of students for the colloquiums of the laboratory. Project execution - implementation of a given system in a multi-person group	45	W_001, W_002, W_003

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Computer network technologies

**Module code:** W4-IN-N2-20-2-TSK

**1. Number of the ECTS credits:** 3

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	characterizes network devices, such as: network interface card, switch, router, host. Can describe issues connected with switching frames and routing packets.	K_W02 K_W03 K_W06	1 3 1
M_002	Understands the need to use layered network model OSI-7 for description of phenomena occurring in Computer networks. Understands divisions within TCP/IP stack of phenomena occurring in the Internet.	K_W03 K_W05 K_W06	2 2 2
M_003	Can join hosts in a local network using various transmission media using point-point topologies and joining into infrastructure. Tests advanced media and links.	K_U01 K_U03 K_U05 K_U10	1 1 1 1
M_004	Can configure router as a core layer device. Constructs a network comprising sub-nets of L3 layer. Designs vertical and horizontal cabling.	K_U01 K_U02 K_U03 K_U08	1 1 1 2

### **3. Module description**

<b>Description</b>	Aim of the module is familiarizing with issues connected with designing, implementation and diagnostics of a local computer network. The module deals with issues connected with process of information transfer in three lowest layers of reference model OSI-7.
--------------------	---

<b>Prerequisites</b>	
----------------------	--

<b>4. Assessment of the learning outcomes of the module</b>
---

code	type	description	learning outcomes of the module
W_001	Module credit	Questions from lecture subject matter.	M_001, M_002
W_002	Short tests.	Checking the level of understanding of issues concerning computer network development and routing.	M_001, M_004
W_003	Conversation during tasks crediting.	Checks the skill of generalizing knowledge acquired during tasks solving.	M_003, M_004

<b>5. Forms of teaching</b>
-----------------------------

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Content available in the form of multimedia transfer.	10	Preparing for credit.	20	W_001
Z_002	laboratory classes	Exercises referring to networks joining and LAN networks configuring.	20	Designing own networks with use of CISCO Packet Tracer.	40	W_002, W_003

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Computer simulations

**Module code:** W4-IN-N2-20-1-SK

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Student has skills for creating simulation models.	K_U01 K_U06 K_U08	1 1 1
M_002	Student has knowledge of various computer simulation techniques.	K_U08 K_W02	1 1
M_003	Student has ability to implement the concepts in designing simulation experiments.	K_K04 K_U02 K_U03 K_U04 K_U08 K_U09	1 1 1 1 1 1

<b>3. Module description</b>	
<b>Description</b>	The module objective is to give students a knowledge, which is necessary for creating simulation models and conducting simulation experiments . The presented topics are related to various computer simulation techniques, simulation software and applications of simulators in the design and optimization of technical systems. Students will gain the abilities to build models with use of simulation environments.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
<b>code</b>	<b>type</b>	<b>description</b>	<b>learning outcomes of the module</b>
W_001	Exam	Two-hour test with closed and open questions.	M_001, M_002, M_003
W_002	Reports	Presentation of the reports and discussion of the developed projects.	M_001, M_002, M_003

6. Mode of study	part-time

**Module:** Concurrent programming

**Module code:** W4-IN-N2-20-2-PW

**1. Number of the ECTS credits:** 2

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Has extended knowledge of the ways in which parallel and concurrent computing are performed on modern computers.	K_U09 K_W02	1 1
M_002	Has knowledge about the safety properties of concurrent programs and is able to verify that the given concurrent algorithm is correct.	K_U05 K_U09 K_W02 K_W04 K_W05	1 1 1 1 1
M_003	Is able to identify and solve typical problems of concurrent computations.	K_K04 K_U05 K_U09 K_W02 K_W04 K_W05	1 1 1 1 1 1
M_004	Is able to assess the effectiveness of a parallel algorithm.	K_U05 K_W02 K_W04	1 1 1

3. Module description	
<b>Description</b>	The aim of the course is to introduce students to the subject of design and implementation of correct and efficient concurrent algorithms. The practical aspects of the presented issues are emphasized, and examples made using modern programming languages and tools are presented.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Final test.	Students are tested on the knowledge gained during lectures and laboratory classes. The test consists of a number of closed and (optionally) open questions.	M_001, M_002, M_003, M_004
W_002	Test.	At least one test assessing the knowledge gained by students during laboratory classes.	M_001, M_002, M_003
W_003	Programming assignment.	An optional programming assignment (project) that checks the programming skills acquired during the course.	M_001, M_002, M_003, M_004

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Presentation of the course material in spoken and written forms, supplemented with multimedia content. Emphasizing issues that are more difficult to understand and have deeper theoretical foundations. Engaging listeners by asking questions about the content presented.	10	Reading recommended books and articles. Analysis and repetition of lecture content. Preparation for the final test.	15	W_001
Z_002	laboratory classes	Preparation of students to apply the knowledge in programming practice through the presentation of sample programs and programming tools. Discussion of the methodology by pointing out the key steps required to obtain correct and efficient solutions to typical concurrent programming problems.	10	Working on assignments. Studying the recommended literature.	25	W_002, W_003

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Data analysis in business

**Module code:** W4-IN-N2-20-F-ADwB

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
code	description	learning outcomes of the programme	level of competence (scale 1-5)
M_001	The student has knowledge about the average measures, the volatility measures and the asymmetry measures and uses them in order to perform a descriptive analysis of business data. The student has knowledge about the issues of interdependence analysis, correlation and regression analysis to discover relationships occurring in business data.	K_W01 K_W09	1 1
M_002	The student has knowledge about classification and regression trees, neural networks, fundamental and technical analysis used to analyse business and financial data.	K_W09	1
M_003	She/He can make an initial assessment of business data, present it in an appropriate form, select the model or models suitable for analysis. She/He can compare the obtained results and draw conclusions based on them.	K_K04 K_U01 K_U08	1 1 1
M_004	She/He can use the available programs for business data analysis.	K_U09	1

<b>3. Module description</b>	
<b>Description</b>	Data analysis in business aims at developing skills of using statistical population characteristics and using data mining models for business data analysis. The goal of the course is also to improve knowledge of classic and modern data analysis techniques on the example of financial data. Topics: 1. Gathering, development and graphic presentation of data. 2. Elements of business data descriptive analysis. 3. Analysis of correlation, dependence and regression. 4. Application of classification and regression trees for business data analysis. 5. Application of technical and fundamental analysis to financial data. 6. Application of neural networks for business data analysis.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Examination reports	Preparation of written reports and their oral presentation at a specified time as a verification of acquired skills during problems' solving.	M_001, M_002, M_003, M_004
W_002	Written test	Verification of knowledge and skills based on the analysis of tasks solutions during written test.	M_001, M_002, M_003

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Lecture presenting concepts and facts from the scope of program contents which are listed in the module and illustrating them with numerous examples	15	Self-study of lectures and literature	15	W_002
Z_002	laboratory classes	Laboratory, during which students perform exercises with the help of the teacher, which develop the skills listed in the set of learning outcomes of the module	30	Self-improvement of skills listed in the set of learning outcomes of the module	60	W_001, W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Data mining

**Module code:** W4-IN-N2-20-2-ED

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Is aware of the impact of data mining methods and data types on the quality of knowledge explored.	K_K02	1
M_002	Has knowledge of data types, similarity measures, classification quality measures	K_W09	2
M_003	Has knowledge of data preprocessing (discretization, normalization, empty data)	K_W09	2
M_004	Has knowledge of choosing the right method of exploration depending on the type of input data and expected results	K_W09	3
M_005	Is able to prepare a set for analysis (discretize data, normalize data, empty data)	K_U03 K_U08 K_U09	2 2 4
M_006	Is able to implement selected cluster analysis algorithms	K_U08 K_U09	2 4
M_007	Has basic knowledge of association and decision-making rules and approaches to constructing them	K_U09	2
M_008	Has basic knowledge of the subject and is able to determine the function of linear regression.	K_W01 K_W09	1 1
M_009	He can classify data and properly interpret the result	K_W09	3

### **3. Module description**

<b>Description</b>	The goal is to introduce the listener to data mining methods, classification issues, grouping and induction of rules from data. content:
--------------------	---

	1. Preliminary concepts 2. Preparation and initial data processing 3. Clustering 4. Basics of classification 5. Decision rules 6. Association rules 7. Decision trees 8. Classifier teams 9. Linear regression
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
<b>code</b>	<b>type</b>	<b>description</b>	<b>learning outcomes of the module</b>
W_001	exam (test)	Knowledge verification based on the content presented in the lecture. The exam consists of both open and closed theory questions.	M_001, M_002, M_003, M_004, M_005, M_006, M_007, M_008, M_009
W_002	Projects and reports	Developing projects with reports for them within a specified period as a verification of the skills acquired in solving problems.	M_001, M_002, M_003, M_004, M_005, M_006, M_007, M_008, M_009

<b>5. Forms of teaching</b>						
<b>code</b>	<b>form of teaching</b>			<b>required hours of student's own work</b>		<b>assessment of the learning outcomes of the module</b>
	<b>type</b>	<b>description (including teaching methods)</b>	<b>number of hours</b>	<b>description</b>	<b>number of hours</b>	
Z_001	lecture	Transferring the content of education in verbal form using audiovisual means and other written teaching aids.	20	Preparation for the exam.	20	W_001
Z_002	laboratory classes	Detailed preparation of students to solve tasks with an indication of the methodology of the procedure, an indication of the order of performed activities.	20	Preparation for the laboratory. Student's independent solution of tasks assigned to the laboratory, preparation of reports	60	W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Data visualization

**Module code:** W4-IN-N2-20-F-WD

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Has knowledge about the use and implementation of data visualization methods.	K_W02 K_W04 K_W09	1 1 3
M_002	Has knowledge of how to process and visualize data, about the methods used and how to interpret the results.	K_W04 K_W09	1 2
M_003	Is able to select and implement the appropriate method of data visualization	K_U01 K_U03	1 1
M_004	Is able to interpret the result of data visualization and justify the techniques used	K_U08 K_U09 K_U10	1 1 1
M_005	Can implement an automated data visualization system, working individually or in a team.	K_U02 K_U03 K_U09	1 1 1
M_006	Is aware of the process of improvement and tracking the latest solutions in the field of data visualization	K_K01 K_K03	2 1

3. Module description	
<b>Description</b>	The aim of the module is to introduce students with the possibilities of advanced data visualization with elements of automation using scripting languages such as Python or R.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Reports	Preparation of written reports, their completion within a specified period as a verification of skills acquired during problem solving.	M_001, M_002, M_003, M_004, M_006
W_002	project	Develop individual or group project and documentation system data visualization.	M_001, M_002, M_003, M_004, M_005, M_006

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Lectures conducted using multimedia tools, discussing issues related to the visualization and automation of data visualization in scripting languages.	15	Preparation for laboratories and passing the lecture.	20	W_002
Z_002	laboratory classes	Preparing students to perform lab exercises. Practical presentation of issues discussed during lectures.	30	Preparation for laboratory exercises. Self-solving laboratory exercises. Preparation of the final project.	55	W_001, W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)

6. Mode of study	part-time

**Module:** Decision and association rules in knowledge data discovery

**Module code:** W4-IN-N2-20-F-RDAOW

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Has knowledge regarding quality measures for knowledge representation in the form of decision and association rules.	K_W09	3
M_002	Knows popular approaches and algorithms for construction decision and association rules.	K_W02 K_W04	3 2
M_003	Is able to apply decision and association rules in knowledge discovery.	K_U01 K_U03 K_U08 K_W09	4 4 3 3
M_004	Is able to choose and present the appropriate algorithm for creating a classification model for the considered problem.	K_U08 K_U09	3 3

### **3. Module description**

<b>Description</b>	The aim is to familiarize students with decision and association rules as a models of knowledge representation and classification models. Measures of rules quality, approaches and algorithms for their construction and applications in knowledge discovery will be studied.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Test	Knowledge verification is based on the content presented during lectures. It consists of questions regarding considered issues.	M_001, M_002, M_003
W_002	Raport presentation for laboratory works	Raport preparation and presentation in specified deadline, as a verification of skills acquired during implementation of laboratory assignments.	M_001, M_002, M_003, M_004

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Forwarding knowledge in verbal form using audio-visual media and other written didactic aids. Activation of students by asking questions and simple tasks regarding the considered topics.	15	Familiarize with subject of lectures, investigation considered topics.	15	W_001
Z_002	laboratory classes	Preparation of students for solving problems and assignments with an indication of the methodology and the order of performed activities.	30	Preparation for the laboratory tasks, independent solution of laboratory tasks by students, preparation of reports.	60	W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Deep learning with neuralk networks

**Module code:** W4-IN-N2-20-F-UGzSN

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Has knowledge of artificial neural networks.	K_W09	1
M_002	Knows methods and algorithms for learning deep neural networks	K_W02	1
M_003	Is able to design and implement a deep neural network	K_U01	1
M_004	Can train a neural network to solve a specific machine learning problem.	K_U02	1
M_005	Can assess the effectiveness of a trained neural network.	K_U05	1
M_006	He knows the possibilities of modern neural networks. He is aware of the importance of machine learning methods in developing modern IT solutions.	K_K01	1

### **3. Module description**

<b>Description</b>	At present, deep learning algorithms are increasingly used in modern information technologies. In 2012, a deep neural network dominated the prestigious competition dedicated to the automatic recognition of image content. Since then, neural networks have revolutionized methods of machine image analysis. Currently, neural networks are also the main engine of speech recognition algorithms and automatic text translation. In 2014, Google acquired DeepMind Technologies, the company that developed AlphaGo: a program that uses deep neural networks to play Go. In 2016, AlphaGo beat (for the first time in history) a player with the 9th Dan.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
<b>code</b>	<b>type</b>	<b>description</b>	<b>learning outcomes of the module</b>
W_001	Colloquium	Solving tasks and answering open questions.	M_001, M_002
W_002	Implementation project	Project evaluation after the multimedia presentation of the whole group.	M_003, M_004, M_005
W_003	Multimedia presentation	Assessment of the validity of the self-assessment of collective work and verification of the hypotheses.	M_006

<b>5. Forms of teaching</b>						
<b>code</b>	<b>form of teaching</b>			<b>required hours of student's own work</b>		<b>assessment of the learning outcomes of the module</b>
	<b>type</b>	<b>description (including teaching methods)</b>	<b>number of hours</b>	<b>description</b>	<b>number of hours</b>	
Z_001	lecture	Giving the educational content in verbal form with the use of content visualization. Focusing on conceptually difficult material and indicating addresses of websites and e-learning package	15	Getting to know the topic of the lecture using the existing packages of methods: script, websites and e-learning package	30	W_001
Z_002	laboratory classes	Detailed preparation of students for the implementation of algorithms with indication of the methodology of conduct, indication of the sequence of activities to be performed	30	Self-development and preparation of students for the colloquiums of the laboratory. Project execution - implementation of a given system in a group of many people	45	W_001, W_002, W_003

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** General academic module (Humanities)

**Module code:** W4-IN-N2-20-3-MOH

**1. Number of the ECTS credits:** 3

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	The student knows selected issues related to the subject-related specificity of the humanities, understands their nature, place and importance in the system of sciences, as well as their connections with fields of science and scientific disciplines specific to the studied programme, allowing for the integration of perspectives appropriate for different scientific disciplines	U_OOD W_OOD	4 4
M_002	The student is able to select, interpret and evaluate knowledge from selected disciplines in the field of humanities and integrate and apply it in scientific activity and professional practice in a manner that allows for original and creative solutions to problems that they experience as participants in cultural life.	U_OOD W_OOD	4 4
M_003	The student is able to creatively undertake, analyse and become involved in current sociocultural discourses, using knowledge of the studied problems of contemporary humanities and acquired communication skills as well as subject- related argumentation that considers various scientific approaches and types of scientific reflection.	U_OOD W_OOD	4 4
M_004	The student, who is a participant in cultural life in its various manifestations, shows the need for continuous learning and improvement of those dispositions that allow to appreciate humanistic reflection and integrate it with issues and experiences resulting from choosing one's own path of scientific and professional activities and related to individual cultural activity.	K_OOD U_OOD W_OOD	3 3 3

### **3. Module description**

<b>Description</b>	General Academic Module in Humanities module allows the student to get acquainted with selected areas of humanities and allows a practical analysis of the assumptions presented in various humanistic theories. The student has the opportunity to compare various methodological and interpretative approaches, gain knowledge about the benefits and the limitations of adopting a humanistic perspective in the perception of reality. The student learns to implement the paradigms of a humanistic thinking to his/her scientific activity and creatively solves the problems posed during the course. The student learns the ability of critical integration of approaches characteristic of humanities with the viewpoints belonging to areas of science and scientific disciplines appropriate for the programme. In the course of study, the student identifies the ways of iactive participation in current and future cultural
--------------------	--

	formations, recognising in the presented and experienced activities the paths of a deepened individual participation in the life of a relevant human communities.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
<b>code</b>	<b>type</b>	<b>description</b>	<b>learning outcomes of the module</b>
W_001	Test	A written or oral test in accordance with the description of the verification method included in the syllabus.	M_001, M_002, M_003, M_004
W_002	Continuous assessment	Current assessment of the individual work of the student, which is the mean of the grades from the activities conducted during the classes, is consistent with the description of the verification method included in the syllabus.	M_001, M_002, M_003, M_004

<b>5. Forms of teaching</b>						
<b>code</b>	<b>form of teaching</b>			<b>required hours of student's own work</b>		<b>assessment of the learning outcomes of the module</b>
	<b>type</b>	<b>description (including teaching methods)</b>	<b>number of hours</b>	<b>description</b>	<b>number of hours</b>	
Z-001	depending on the choice	Depending on the type of classes, the following methods may be used: expository, problem, task, project methods, the analysis of the source material, etc.	45	Independent and thorough reading of the materials indicated in the syllabus, revision and consolidation of knowledge or skills acquired during classes.	45	W_001, W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies

5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Intellectual property protection

**Module code:** W4-IN-N2-20-3-OWI

**1. Number of the ECTS credits:** 2

<b>2. Learning outcomes of the module</b>			
code	description	learning outcomes of the programme	level of competence (scale 1-5)
M_001	explains the basic concepts and principles of intellectual property protection	K_W08	4
M_002	interprets the provisions related to the procedure for obtaining and enforcing protection rights on intellectual property subjects	K_W08	4
M_003	recognizes the processes of implementing procedures related to the protection of intellectual property	K_U01	1
M_004	creates documentation of intellectual property subjects	K_U01	1
M_005	is aware of the importance of intellectual property protection in professional work and in the economy	K_K03	2

### 3. Module description

<b>Description</b>	During the lecture, the student becomes familiar with the aspects of legal protection of intellectual property objects. Theoretical knowledge transferred concerns concepts in the field of intellectual property, sources of law, and legal protection issues, among others works (including computer programs and databases), inventions, utility models, industrial designs, trademarks. It aims to familiarize with the principles of copyright protection, avoiding infringements of intellectual property and to acquire practical skills regarding applications for the protection of intellectual property.
<b>Prerequisites</b>	

### 4. Assessment of the learning outcomes of the module

code	type	description	learning outcomes of the module
W_001	written test	a written colloquium (test) will be conducted on the basic issues of intellectual property protection	M_001, M_002, M_003

W_002	problem task	student individually develops a solution to a problem task on a given topic in the field of intellectual property protection	M_002, M_003, M_004, M_005
-------	--------------	--	----------------------------

### 5. Forms of teaching

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Transfer of the content of the lecture using didactic methods - informative lecture, problem lecture and the use of multimedia means and tools and platforms for creating multimedia educational tools. Paying attention to issues that are the subject of the student's own work.	10	Work with selected subject literature and law regulations, including independent assimilation of knowledge on the indicated issues. Preparation to pass - written test and problem task.	50	W_001, W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies

6. Mode of study	part-time

**Module:** intelligent data processing

**Module code:** W4-IN-N2-20-F-IPD

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Is aware of the possibilities offered by intelligent data processing, especially in the context of large data sets.	K_K02	1
M_002	Has knowledge of the basics of artificial intelligence, including fuzzy logic and fuzzy inference	K_W02	2
		K_W04	3
		K_W09	2
M_003	Has knowledge of data mining in the context of detecting dependencies and patterns (e.g. rules) in data as well as atypical data.	K_W02	1
		K_W04	2
		K_W08	2
		K_W09	4
M_004	Has knowledge of the basics of artificial neural networks and so-called Deep learning.	K_W02	2
		K_W04	2
		K_W08	2
		K_W09	3
M_005	Is able to implement or manually perform calculations and operations of fuzzyfication, fuzzy inference and defuzzyfication	K_U03	3
		K_U07	2
		K_U08	2
		K_U09	3
M_006	Is able to apply the selected algorithm of rule induction (e.g. decision trees, association rules) for any data set or detection of unusual cases.	K_U01	1

		K_U03	3
		K_U08	2
		K_U09	3
M_007	Can use a dedicated tool to create a neural network model and interpret learning results of the created model for any data set.	K_U03	3
		K_U07	2
		K_U08	2
		K_U09	3

### 3. Module description

<b>Description</b>	The goal is to introduce the student to methods of data mining, classification tasks, clustering and rule induction process. It also includes the basics of fuzzy inference or deep learning with elements of neural networks.
<b>Prerequisites</b>	

### 4. Assessment of the learning outcomes of the module

code	type	description	learning outcomes of the module
W_001	exam (test)	Knowledge verification based on the content presented in the lecture. The exam consists of both open and closed theory questions.	M_001, M_002, M_003, M_004, M_005, M_006, M_007
W_002	Projects and reports	Developing projects with reports for them within a specified period as a verification of the skills acquired in solving problems.	M_001, M_005, M_006, M_007

### 5. Forms of teaching

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Transferring the content of education in verbal form using audiovisual means and other written teaching aids	15	Preparation for the exam	15	W_001
Z_002	laboratory classes	Preparing students to solve tasks with an indication of the methodology of the procedure, an indication of the order of performed activities.	30	Students independently solve tasks assigned to the laboratory, prepare reports for their projects.	60	W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Understands the need for implementing the internet protocols.	K_W05 K_W06	1 3
M_002	Characterizes TCP/IP protocol stack and understands the need of standardization of Internet layers and application operation.	K_W03 K_W05 K_W06 K_W07	3 1 3 1
M_003	Characterizes the need to use physical and logical addressing* in LAN and WAN networks. Understands the need of migration from IPv4 to IPv6 protocols. Understands threats resulting from this migration. Explains necessity of tunneling IPv6 to IPv4 in the transition period.	K_W03	4
M_004	Divides big LAN networks into subnet of L3 layer, eliminating excessive number of layer L2 divulgations, selects and configures appropriate hardware devices.	K_W03	3
M_005	Configures dynamic routing protocols.	K_U08 K_U10	2 1
M_006	Presents the group with his own configuration solutions.	K_K04	1

### **3. Module description**

<b>Description</b>	Aim of the module is familiarizing with issues of need to use network protocols of L3 and L4 layers and OSI-7 model.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Lecture.credit.	Questions from the lectures subject matter.	M_001, M_002, M_003
W_002	Module tests CISCO CCNA.	Checking level of understanding of issues concerning designing the computer network and routing protocols.	M_002, M_003, M_004
W_003	Conversation during tasks crediting.	Checks the skill o generalizing knowledge acquired during tasks solution.	M_004, M_005, M_006

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Content available in the form of multimedia transfer.	15	Preparation for the credit.	30	W_001, W_002
Z_002	laboratory classes	Blackboard exercises referring to network addressing and practical exercises referring to routers configuring, reports, CSCO module tests.	30	Designing student's own network, using CISCO Packet Tracer.	45	W_002, W_003

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Introduction to scientific research.

**Module code:** W4-IN-N2-20-1-WDBN

**1. Number of the ECTS credits:** 1

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Initiating scientific research.	K_K01 K_K02 K_K03 K_K04 K_K05 K_U01 K_U02 K_U06 K_W07 K_W08	1 1 1 1 1 1 1 1 1 1

**3. Module description**

<b>Description</b>	The aim of the course is to acquaint students with the offer of scientific research carried out in the Institute of Computer Science.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
<b>code</b>	<b>type</b>	<b>description</b>	<b>learning outcomes of the module</b>
W_001	Report	Prepare a short report on the selected topic of the research work.	M_001

<b>5. Forms of teaching</b>						
<b>code</b>	<b>form of teaching</b>			<b>required hours of student's own work</b>		<b>assessment of the learning outcomes of the module</b>
	<b>type</b>	<b>description (including teaching methods)</b>	<b>number of hours</b>	<b>description</b>	<b>number of hours</b>	
Z_001	seminar	Presentation of educational content in verbal form with the use of content visualization.	2	Participation in meetings carried out by research groups.	28	W_001

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** IT for the Blind and Visually Impaired

**Module code:** W4-IN-N2-20-3-T

**1. Number of the ECTS credits:** 2

<b>2. Learning outcomes of the module</b>			
code	description	learning outcomes of the programme	level of competence (scale 1-5)
M_001	Is aware of the problems and existing solutions for the availability of IT applications	K_W07	1
M_002	Is able to assess the problems of IT solutions in the context of users with visual impairments and proposes solutions	K_U05	1
M_003	Applies the principles of available (universal) IT system design and makes others aware of it	K_K02 K_K05	1 1

<b>3. Module description</b>	
<b>Description</b>	Classes introduce IT problems in the context of blind and visually impaired users. Students learn the WCAG requirements necessary to create and implement IT solutions. Additionally, students learn about tools (hardware and software) that are available for blind and visually impaired people.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
code	type	description	learning outcomes of the module
W_001	Test	Test in the form of several questions regarding the scope of the presented issues	M_001, M_002, M_003

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Verbal presentation of the subject content supported by multimedia materials and the presentation of software and hardware.	10	Studying the content provided during the lecture and in the form of shared materials.	50	W_001

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)

5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Managing IT projects and teams

**Module code:** W4-IN-N2-20-2-ZZiP

**1. Number of the ECTS credits:** 2

<b>2. Learning outcomes of the module</b>			
code	description	learning outcomes of the programme	level of competence (scale 1-5)
M_001	Student knows the various methodologies of managing IT projects, primarily project team management, resources, risks, efficiency and quality. Student uses specialist literature (in English).	K_U07 K_W05	2 5
M_002	Student works in a team, uses available IT tools to assist in managing project, understands the need of PM certification.	K_K01 K_U02 K_U03	3 5 3
M_003	Student can present the effects of team work.	K_U04	1

### 3. Module description

<b>Description</b>	The module includes issues related to project management methodologies and projects. Topics of the subject are: project teams, issues of their creation, functioning, development, evaluation and management of their work. In particular, the content concerns IT project management methodologies - starting with the components of the project, its resources. Particular attention is paid to planning, scheduling, risk management, efficiency, quality. Available IT solutions - in particular project management packages (depending on availability of licenses - eg MS Project) will be used during laboratory exercises - as a tool to help manage a complex project.
<b>Prerequisites</b>	

### 4. Assessment of the learning outcomes of the module

code	type	description	learning outcomes of the module
W_001	Lecture credit	Exam in written or oral form (open or closed questions).	M_001

W_002	Practical tasks	An exercise card - exercise's documentation of each of the instruction points; The tasks will be described on the card, which will be the basis for passing the exercise. A practical task implemented in the project team, with an indication of roles, schedule, preparation of the report.	M_002
W_003	Team project presentation	Projekt team presents its organization (methodology, roles), IT project, timetable, resources etc.	M_003

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Presenting the chosen issues with use of audio-visual aids. Examples of methodologies' using, reports, certification plans	10	Studying an additional literature	5	W_001
Z_002	laboratory classes	Classes taught in the form of workshops with specifying subsequent tasks to be performed. The project task executed by project teams, discussion, results presentation.	20	Preparation of practical information necessary to implement the project in a working team. Acquiring proficiency in using IT tools	25	W_002, W_003

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Master's seminar I

**Module code:** W4-IN-N2-20-1-SMI

**1. Number of the ECTS credits:** 2

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Student can use literature, including in foreign languages to prepare elaboration referring to Master thesis.	K_U01 K_U07	2 2
M_002	Student can prepare a plan of work defining timeliness and activities connected with subsequent stages of the thesis writing process.	K_U01 K_U02	1 1
M_003	Student can edit and formulate direct and indirect aims of Master thesis.	K_U01	1
M_004	Student can summarize basic information connected with the thesis range and describe problem discussed in Master thesis.	K_U04	1
M_005	Student can present his work and provide its thematic range, emphasizing the most important issues.	K_U04	1
M_006	Student can answer questions referring to thesis and defend, in confrontation with other students his opinions on subjects discussed in the thesis and the solutions of the problems presented in it.	K_U01 K_U04	1 1
M_007	Student has ability to negotiate and organize work – ability of self-evaluation and self-organization.	K_U05 K_U06	1 1

<b>3. Module description</b>	
<b>Description</b>	Aim of classes is preparing the students to correct planning and executing all the tasks necessary to write Master thesis. As a result, the student should be able to present clearly and justify suggested approach to the described in the thesis problems, including in confrontation with other people.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
<b>code</b>	<b>type</b>	<b>description</b>	<b>learning outcomes of the module</b>
W_001	Presentations	Presentations of subsequent stages of Master thesis realization. Periodical reports in the form of presentation will allow systematic verification of the student's work progress.	M_001, M_002, M_003, M_004, M_005, M_006, M_007
W_002	Articles analyses	Presenting opinions about the chosen scientific articles connected with the thesis topic. It will allow the student to familiarize with different approaches connected with thesis subject and to develop critical insight into the solutions used.	M_004, M_005, M_006, M_007

<b>5. Forms of teaching</b>						
<b>code</b>	<b>form of teaching</b>			<b>required hours of student's own work</b>		<b>assessment of the learning outcomes of the module</b>

**Module:** Mathematical modeling of optimization problems

**Module code:** W4-IN-N2-20-3-MMPO

**1. Number of the ECTS credits:** 3

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Is able to solve a combinatorial optimization task using modern search methods, such as Answer Set Programming and Satisfiability Modulo Theories, in a selected programming language.	K_U01 K_U05 K_U08 K_U09	1 3 3 3
M_002	Is able to use selected programming libraries in order to formulate combinatorial optimization problems as a linear and nonlinear program (also integer program).	K_U01 K_U05 K_U08 K_U09	1 1 3 3
M_003	Has knowledge about formulating combinatorial optimization tasks by means of the modern methods of mathematical modeling.	K_W01 K_W02 K_W04 K_W09	4 3 1 1

### **3. Module description**

<b>Description</b>	This subject aims at the exact and effective solving of intractable optimization problems. The students are familiarizing with the following two approaches: (i) satisfiability modulo theories (for example based on Z3 library), and (ii) answer set programming (for example AnsProlog). Thanks to that every student should know all aspects of using modern exact optimization methods.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Midterm for lecture	Executing assignments that involve all approaches described in the lecture.	M_003
W_002	Midterm for lab	Programming assignments that involve modern combinatorial optimization problems, with the help of Z3 library and AnsProlog language.	M_001, M_002

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Oral presentation with the help of prepared slides. Focusing on the hard part of the topics, giving basic examples and suggesting web pages for more advanced ones.	10	Familiarizing with the topics, appropriate software, selected web pages, and recommended literature.	35	W_001
Z_002	laboratory classes	Preparing students for executing assignments by showing the methodology and handling steps.	10	Writing computer programs and the analysis of existing solutions on the Internet.	35	W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Methods of group decision making

**Module code:** W4-IN-N2-20-F-MPDG

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	The student has knowledge about the topology and architecture of multiple classifier system, methods of building combined classifiers and techniques for fusion of based models' predictions.	K_W02 K_W05 K_W09	1 1 1
M_002	The student has knowledge of the basic issues related to two-player and n-player games i.e. the payoff matrix, the Nash equilibrium and the Shapley value.	K_W01	1
M_003	She/He can choice appropriate architecture and topology of multiple classifier system to the considered problem. She/He can carry out the process of building a combined classifiers and apply the appropriate fusion method.	K_U03 K_U08 K_U09	1 1 1
M_004	She/He can use the selected program to perform the analysis using multiple classifier system.	K_U09	1

### **3. Module description**

<b>Description</b>	<p>The course aims to present issues related to multiple classifier system and fusion methods used when making group decisions. The subject will also cover selected issues from game theory.</p> <p>Content:</p> <ol style="list-style-type: none"> <li>1. Topology and architecture of multiple classifier system</li> <li>2. Methods of constructing combined classifiers: Bagging, Boosting, methods of selecting variables</li> <li>3. Methods for combining prediction results of base classifiers: fusion methods from the abstract, rank and measurement levels</li> <li>4. The problem of diversity of base models</li> <li>5. Introduction to the two-player games, payoff matrix and the Nash equilibrium</li> <li>6. Introduction to the n-player games and the Shapley value</li> </ol>
--------------------	--

<b>Prerequisites</b>	
----------------------	--

<b>4. Assessment of the learning outcomes of the module</b>
---

code	type	description	learning outcomes of the module
W_001	Examination reports	Preparation of written reports and their oral presentation at a specified time as a verification of acquired skills during problems' solving.	M_001, M_002, M_003, M_004
W_002	Test	Verification of knowledge and skills based on the analysis of tasks solutions during written test.	M_001, M_002, M_003

<b>5. Forms of teaching</b>
-----------------------------

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Lecture presenting concepts and facts from the scope of program contents which are listed in the module and illustrating them with numerous examples	15	Self-study of lectures and literature	15	W_002
Z_002	laboratory classes	Laboratory, during which students perform exercises with the help of the teacher, which develop the skills listed in the set of learning outcomes of the module	30	Self-improvement of skills listed in the set of learning outcomes of the module	60	W_001, W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Microcomputers and network couplers

**Module code:** W4-IN-N2-20-F-MiSS

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
code	description	learning outcomes of the programme	level of competence (scale 1-5)
M_001	Describes advantages of MCU microcomputer Harvard architecture and reduced instruction set (RISC).	K_W03 K_W06 K_W09	1 1 1
M_002	Presents various concepts of microcontrollers networks.	K_W03	3
M_003	Understands threats connected with maintenance-free control of manufacturing processes.	K_W03 K_W05 K_W09	2 1 1
M_004	Uses runtime systems for microcomputers.	K_U01 K_U08 K_U09	1 1 1

<b>3. Module description</b>	
<b>Description</b>	Aim of the module is to present the concept of communicating networks and cooperating microcontrollers. The student familiarizes with two microcontrollers families and justifies choice of optimum solutions analyzing widely perceived cost of the solution (equipment cost, energy consumption, simplicity of implementation, etc.).
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Lecture credit	Questions from lecture subject matter.	M_001, M_002, M_003
W_002	Conversation during crediting tasks.	Checks the skill of generalizing skills acquired while tasks execution in the groups of two.	M_004

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Content available in the form of multimedia transfer.	15	Preparing to laboratory classes and to lecture credit.	15	W_001
Z_002	laboratory classes	Writing simple programs for microcomputer using the chosen programming language and runtime environment. Designing and activating microcomputer-controlled devices.	30	Activating programs dedicated to the Designed microcomputer-based device. Preparing specification for the designed device.	60	W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Mobile systems and applications

**Module code:** W4-IN-N2-20-F-SiAM

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Has knowledge in the field of mobile systems programming and using standard modules of mobile devices.	K_W02	1
M_002	Has knowledge in the field of designing graphical user interfaces for mobile applications	K_U10 K_W05	1 1
M_003	Can select an appropriate programming language and environment for programming a device, can operate emulators of mobile devices	K_W04	1
M_004	Designs and implements applications for mobile devices according to the given specification (having particular functionality)	K_U10 K_W03	1 1
M_005	Independently gets acquainted with issues, also beyond the field of study, which enable to create interdisciplinary projects	K_K01 K_U01 K_U05 K_U06	1 1 1 1
M_006	Is able to prepare a documentation for a project task	K_U03	1
M_007	Presents the results of own work, software functionality, can justify selected solutions and draw the appropriate conclusions	K_U04	1

### **3. Module description**

<b>Description</b>	The aim of classes consisting this module is to prepare students to create applications for mobile devices. As a result, the student should exhibit knowledge in the field of construction and hardware capabilities as well as programming capabilities of mobile devices. Moreover, students should be
--------------------	--

	familiar with issues of wireless data transfer and the principles of operating the GPS system and other modules typical for mobile systems and devices. In consequence, this should lead to an acquisition of a complex knowledge enabling to create applications for mobile devices of various types.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
<b>code</b>	<b>type</b>	<b>description</b>	<b>learning outcomes of the module</b>
W_001	Project Task - Mobile App	The task is to design, implement, launch and test a mobile application with a functionality accepted by the teacher	M_001, M_002, M_003, M_004, M_005, M_006
W_002	Presentation and discussion on the implementation of the project task	Questions evaluating the level of understanding of issues related to the construction and operating of mobile device allowing its programming. Verification of the ability to generalize the skills acquired during the implementation of the task.	M_001, M_002, M_003, M_005, M_007

<b>5. Forms of teaching</b>						
<b>code</b>	<b>form of teaching</b>			<b>required hours of student's own work</b>		<b>assessment of the learning outcomes of the module</b>
	<b>type</b>	<b>description (including teaching methods)</b>	<b>number of hours</b>	<b>description</b>	<b>number of hours</b>	
Z_001	lecture	Description of principles and content, discussion during classes. Material available in the form of a multimedia content. Online courses and training available on e-learning platforms.	15	Familiarization with the materials shared online. Completion of the selected - accepted by the teacher - online course. Preparing to pass the course.	15	W_002
Z_002	laboratory classes	Design, implementation, running and testing of sample mobile applications. Presentation of work effects, discussion of applied solutions.	30	Design, implementation, running and testing of a project task. Familiarization with the specification of the project task. Preparation for laboratory classes. Preparation of documentation and presentation of the project task.	60	W_001, W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Modern programming languages

**Module code:** W4-IN-N2-20-1-NJP

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
code	description	learning outcomes of the programme	level of competence (scale 1-5)
M_001	Student can choose and implement the appropriate structure in the programming language.	K_K01 K_U01 K_U04 K_W04	1 2 1 2
M_002	Student can describe algorithms using selected programming language structures.	K_K01 K_U04 K_W01 K_W02	1 1 3 3
M_003	Student has the knowledge of the programming language.	K_U04 K_U06 K_W02 K_W04	1 1 2 2

<b>3. Module description</b>	
<b>Description</b>	The following topics will be presented. Kotlin for Server Side, Android, JavaScript, Native, Data Science programming. Basic syntax, idioms and coding conventions. Basic types, packages and imports. Classes and objects. Functions, lambdas and inline functions. Collections. Coroutines. Multiplatform programming. Core libraries. Kotlin for Java and JavaScript. Native programming.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Written exam	Knowledge verification based on the content presented in the lecture. The exam is carried out in the form of a test.	M_001, M_002, M_003
W_002	Passing exercises	Submission of projects (applications) within a specified period as a verification of skills acquired during problem solving.	M_001, M_002, M_003

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Lectures are carried out by using audiovisual means.	20	Studying lecture topics basing on books and materials from the Internet.	20	W_001
Z_002	laboratory classes	Compulsory classes in the computer lab conducted according to the schedule.	20	Solving practical tasks. Development and practical implementation of the project.	60	W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Monographic lecture

**Module code:** W4-IN-N2-20-1-WM

**1. Number of the ECTS credits:** 1

<b>2. Learning outcomes of the module</b>			
code	description	learning outcomes of the programme	level of competence (scale 1-5)
M_001	Has knowledge about the main research trends in such fields of computer science as: machine learning, computer networks, data analysis, and decision support systems.	K_W02	1

<b>3. Module description</b>	
<b>Description</b>	The purpose of this monographic lecture is to familiarize students with scientific research that is conducted in our faculty on computer science and telecommunication. Every research group (within 4 ours) has the opportunity to present basic methods and ideas using in its research and then to list topics of the potential master theses.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
code	type	description	learning outcomes of the module
W_001	Midterm for lecture	Student is suppose to select a supervisor, to determine the theme of his/her thesis, and to demonstrate the basic knowledge about the topic by writing an introduction of the thesis.	M_001

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Oral presentation with the help of prepared slides. Focusing on the hard part of the topics, giving basic examples and suggesting web pages for more advanced ones.	12	Familiarizing with the topics, selected web pages, and recommended literature.	18	W_001

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Monographic lecture - Combinatorial machine learning

**Module code:** W4-IN-N2-20-2-WMwJA

**1. Number of the ECTS credits:** 2

<b>2. Learning outcomes of the module</b>			
code	description	learning outcomes of the programme	level of competence (scale 1-5)
M_001	Can recognize analogies in the knowledge presented in the lecture, as well as the concepts employed out in other courses.	K_U01 K_W02	4 2
M_002	Knows what are the decision rules, decision trees and reducts, and can provide examples of their application to solve real problems.	K_U07 K_W09	4 3
M_003	Is able to present an algorithm for construction decision rules, decision trees and tests.	K_W02 K_W04	3 1
M_004	Is able to present the problem of construction rules, trees and tests as an optimization problem.	K_U08 K_W02	2 2

<b>3. Module description</b>	
<b>Description</b>	The aim is to acquaint students with decision trees, decision rules and tests as tools for discovering knowledge from data, their analysis, study relationships between these objects, and show examples of applications.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
code	type	description	learning outcomes of the module
W_001	Test	Knowledge verification is based on the content presented during lectures.	

			M_001, M_002, M_003, M_004
W_002	Solving assignments	Presentation, in specified term, results of solved assignments as a verification of skills acquired during problem solving.	M_003, M_004

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Forwarding knowledge in verbal form using audio-visual media and other written didactic aids. Paying attention to issues more difficult to understand. Activation of students by asking questions and simple tasks regarding the considered topic.	20	Familiarize students with the subject of lectures, investigation discussed issues in the framework of connections between the examined objects, solving tasks in the area of knowledge presented during lectures.	40	W_001, W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Network Systems Security

**Module code:** W4-IN-N2-20-F-BSS

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Understands the need to protect network devices.	K_W03	3
M_002	Understands the need to encrypt and tunneling transmission on the Internet - IPSec, SSL, VPN.	K_W03 K_W06	2 2
M_003	Understands the need to limit user access to network resources - AAA (Authentication, authorisation and accounting).	K_W03 K_W06 K_W08	1 1 1
M_004	Can implement a firewall.	K_K02 K_U08 K_U10	1 2 1
M_005	Can analyze network traffic.	K_U01 K_U08 K_U09	1 2 1

<b>3. Module description</b>	
<b>Description</b>	Aim of the module is familiarizing with issues connected with designing, and operation of secure computer networks and behavior-based security.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Module credit.	Questions from lecture subject matter.	M_001, M_002, M_003
W_002	Conversation during tasks crediting.	Checks the skill of generalizing knowledge acquired during tasks solving.	M_004, M_005

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Content available in the form of multimedia transfer.	15	Preparing for credit.	30	W_001
Z_002	laboratory classes	Exercises referring to network security and LAN networks configuring.	30	Design and implementation of FireWall.	45	W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Outlier detection algorithms

**Module code:** W4-IN-N2-20-F-AWOWD

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Is aware of the essence of deviations in the data, which are not errors in the data but real different objects.	K_K01	1
M_002	Has knowledge of the basics of descriptive statistics, including issues to identify deviations in data.	K_W04 K_W09	3 2
M_003	Has knowledge of methods of graphical data representation and detection of deviations in such representations.	K_U09	3
M_004	Has knowledge of selected deviation detection algorithms, including algorithms based on distance and data distribution, as well as algorithms based on data density or local deviations.	K_W02 K_W04 K_W09	2 2 3
M_005	He can choose the right algorithm to detect deviations depending on the type of data being analyzed.	K_U01 K_U03 K_U08 K_U09	2 2 2 2
M_006	Can implement or use ready-made libraries / packages that allow the use of a deviation detection algorithm for a selected data set.	K_U01 K_U03 K_U08 K_U09	2 2 2 3
M_007	Can determine the similarity / distance between two objects in multidimensional space.	K_U01 K_U03	2 2

		K_U08	2
		K_U09	3

### 3. Module description

<b>Description</b>	The goal is to introduce the listener to deviation detection algorithms so important in practical applications, e.g. for detecting embezzlement or unusual disease symptoms. Among the issues raised will be both algorithms based on the distance between objects in the analyzed space as well as algorithms derived from cluster analysis that allow identifying objects unlike others and not groupable.
<b>Prerequisites</b>	

### 4. Assessment of the learning outcomes of the module

code	type	description	learning outcomes of the module
W_001	exam (test)	Knowledge verification based on the content presented in the lecture. The exam consists of both open and closed theory questions.	M_001, M_002, M_003, M_004, M_005, M_006, M_007
W_002	Projects and reports	Developing projects with reports for them within a specified period as a verification of the skills acquired in solving problems.	M_001, M_005, M_006, M_007

### 5. Forms of teaching

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Transferring the content of education in verbal form using audiovisual means and other written teaching aids.	15	Preparation for the exam.	15	W_001
Z_002	laboratory classes	Detailed preparation of students to solve tasks with an indication of the methodology of the procedure, an indication of the order of performed activities.	30	Preparation for the laboratory. Student's independent solution of tasks assigned to the laboratory, preparation of reports	60	W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Recommendation systems and social networks

**Module code:** W4-IN-N2-20-F-SRiSS

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Has knowledge about the use and implementation of algorithms used in recommendation systems	K_W01 K_W02	1 1
M_002	Has knowledge of the operation of recommendation systems and social networks.	K_W02 K_W05 K_W07	1 1 1
M_003	Can choose and implement the appropriate algorithm used in recommendation systems	K_U01 K_U08 K_U09	1 1 1
M_004	Is able to develop a scheme of dealing with data in recommendation systems, aimed at the proper operation of such a system.	K_U03 K_U04 K_U06 K_U09	1 1 1 1
M_005	Is aware of raising their competences through continuous self-improvement	K_K01 K_K02	1 1

### **3. Module description**

<b>Description</b>	The aim of the module is to familiarize students with recommendation systems, their operating principles and algorithms associated with them. And with social networks and methods of their analysis.
--------------------	---

<b>Prerequisites</b>	
----------------------	--

<b>4. Assessment of the learning outcomes of the module</b>
---

code	type	description	learning outcomes of the module
W_001	Reports	Preparation of written reports, their completion within a specified period as a verification of skills acquired during problem solving.	M_001, M_002, M_003, M_004, M_005
W_002	Final test	Test checking knowledge of the topics covered in lectures.	M_001, M_002, M_005

<b>5. Forms of teaching</b>
-----------------------------

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Lectures conducted using multimedia tools, discussing issues related to recommendation systems and social networks.	15	Preparation for laboratories and passing the lecture.	20	W_002
Z_002	laboratory classes	Preparing students to perform lab exercises. Practical presentation of issues discussed during lectures.	30	Preparation for laboratory exercises. Self-solving laboratory exercises.	55	W_001

<b>1.</b>	<b>Field of study</b>	<b>Computer Science</b>
2.	Faculty	Faculty of Science and Technology
3.	Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4.	Level of qualifications/degree	second-cycle studies
5.	Degree profile	general academic
6.	Mode of study	part-time

**Module:** Script languages in data analysis

**Module code:** W4-IN-N2-20-F-JSwAD

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Has knowledge about the use and implementation of algorithms.	K_W02 K_W04	1 1
M_002	Has knowledge of how to analyse data, about the algorithms used in data analysis and how to interpret the results.	K_W04 K_W09	1 1
M_003	Is able to select and implement the appropriate algorithm for data analysis.	K_U08 K_U09 K_U10	1 1 1
M_004	Is able to interpret the result of data analysis and present the results of data analysis motivate the techniques used	K_U03 K_U04 K_U10	2 2 1
M_005	Is able to develop a scheme of data handling, aimed at their correct analysis.	K_U01 K_U02 K_U03	1 1 1
M_006	Is able to implement an automated data analysis system, working individually or in a team.	K_U02 K_U09 K_U10	2 1 3
M_007	Is aware of the impact of algorithms on the results of data analysis	K_K01	1

### 3. Module description

<b>Description</b>	The aim of the module is to introduce students with the possibilities of advanced data analysis with elements of automation using scripting languages such as Python or R.
<b>Prerequisites</b>	

### 4. Assessment of the learning outcomes of the module

code	type	description	learning outcomes of the module
W_001	Reports	Preparation of written reports, their completion within a specified period as a verification of skills acquired during problem solving.	M_001, M_002, M_003, M_004, M_007
W_002	Project	Development of an individual or group project with documentation of the data analysis system.	M_001, M_002, M_003, M_005, M_006, M_007

### 5. Forms of teaching

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Lectures conducted using multimedia tools, discussing issues related to the analysis and automation of data analysis in scripting languages.	15	Preparation for laboratories and passing the lecture.	20	W_002
Z_002	laboratory classes	Preparing students to perform lab exercises. Practical presentation of issues discussed during lectures.	30	Preparation for laboratory exercises. Self-solving laboratory exercises. Preparation of the final project.	55	W_001, W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies
5. Degree profile	general academic
6. Mode of study	part-time

**Module:** Selected graph algorithms

**Module code:** W4-IN-N2-20-F-WAG

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	He is familiar with the concept, features and types of graphs, including trees.	K_W01 K_W04 K_W09	1 1 1
M_002	Understands the functioning of graph algorithms and trees used to solve selected practical problems.	K_W02 K_W04 K_W09	1 1 1
M_003	Can apply an appropriate algorithm to solve a given problem.	K_U01 K_U08	1 1
M_004	The student is able to construct a solution to a given problem according to a specific algorithm and program it in the chosen programming language.	K_U01 K_U02 K_U03	1 1 1
M_005	The student can work in a project-programming team.	K_K01 K_K03 K_K05	1 1 1
M_006	He knows how to implement graphs, including trees, using tables and pointers.	K_W01 K_W09	1 1
M_007	The student is able to implement graphs and trees using data structures available in particular programming languages.	K_U03	1

		K_U04	1
		K_U09	1

### 3. Module description

<b>Description</b>	The aim of the course is to familiarize students with the basic knowledge of graph theory and selected graph algorithms. Practical problems are discussed for which graph representation can be applied and one can solve them by means of appropriate graph algorithms.
<b>Prerequisites</b>	

### 4. Assessment of the learning outcomes of the module

code	type	description	learning outcomes of the module
W_001	Evaluation of presentation and computer implementation	Students develop their own software, the specification of which is given by the teacher, and make presentations on a chosen topic from the given list.	M_001, M_002, M_003, M_004, M_005, M_006, M_007
W_002	Evaluation work	Written mid-term test (including a test performed on a computer during classes)	M_001, M_002, M_003, M_006, M_007
W_003	End-term test	Students answer test questions and describe problems in answering open questions	M_001, M_002, M_003, M_004, M_006, M_007

### 5. Forms of teaching

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Giving the educational content in verbal form with the use of content visualization. Focusing on conceptually difficult material and indicating sources. Illustrating the content using examples.	15	Getting to know the topic of the lecture using the existing packages of methods: manuals, scripts, websites, etc.	30	W_003
Z_002	laboratory classes	Detailed training of students to solve tasks with reference to the methodology of proceeding, showing the sequence of activities performed. Designing solutions and their computer implementation. The students' presentation of their solutions.	30	Solving tasks from particular topics together with analysis of already existing solutions - in materials and on websites. Preparing issues to be discussed or preparing for catching up.	45	W_001, W_002

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology

**Module:** Statistical analysis in research

**Module code:** W4-IN-N2-20-1-ASwPB

**1. Number of the ECTS credits:** 2

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	The student has knowledge about the average measures, the measures of variability, dispersion, asymmetry, correlation analysis and is able to use them.	K_U03 K_U08 K_W01 K_W09	1 1 1 1
M_002	The student has knowledge about various methods of graphic presentation of qualitative and quantitative data. She/He can choose the appropriate graph for the data and create it.	K_U01 K_W09	1 1
M_003	The student has knowledge about statistical inference. She/He is able to use selected statistical tests to confirm the significance of the hypotheses. She/He can choose the right test depending on the hypothesis and data.	K_U01 K_U03 K_U09 K_W01 K_W09	1 1 1 1 1
M_004	She/He can use the selected program to perform statistical analysis and to confirm the hypotheses. Based on the obtained experimental results, she/he can draw conclusions and confirm their statistical significance.	K_K04 K_U01 K_U03 K_U07	1 1 1 1

**3. Module description**

<b>Description</b>	
--------------------	--

	<p>The purpose of the module is to present the basics of data analysis including: descriptive statistics, graphic methods for the presentation of qualitative and quantitative data, elements of statistical inference.</p> <p>Content:</p> <ol style="list-style-type: none"> <li>1. Descriptive statistics: average measures, measures of variability, dispersion, asymmetry, correlation analysis.</li> <li>2. Graphic methods for the presentation of qualitative and quantitative data: histogram, frequency diagram, scatter plot, box plot.</li> <li>3. Elements of statistical inference: concepts of the null and alternative hypothesis, significance level and p-value. Selection of test depending on the hypothesis and the data: Student's t test, Wilcoxon test, Friedman test, Kruskal-Wallis test, Fisher test, chi-square test.</li> </ol>
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
<b>code</b>	<b>type</b>	<b>description</b>	<b>learning outcomes of the module</b>
W_001	Examination reports	Preparation of written reports and their oral presentation at a specified time as a verification of acquired skills during problems' solving.	M_001, M_002, M_003, M_004
W_002	Test	Verification of knowledge and skills based on the analysis of tasks solutions during written test.	M_001, M_002, M_003

<b>5. Forms of teaching</b>

**Module:** Systemy wspomagania decyzji

**Module code:** W4-IN-N2-20-F-SWD

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	The student has basic knowledge of decision support systems.	K_K04 K_U01 K_U05 K_U09 K_U10 K_W02 K_W09	1 1 1 1 1 1 1
M_002	The student has basic knowledge in the field of utility theory, the application of deterministic (Hurwicz, Laplace) and non-deterministic criteria (e.g. max. Expected utility) in decision support systems.	K_U01 K_U05 K_U09 K_W02 K_W05	1 1 1 1 1
M_003	The student has basic knowledge of Bayesian networks and their applications in supported decisions.	K_U05 K_W01	1 1
M_004	The student has basic knowledge of time series prediction as part of the decision support system.	K_U01 K_W02	1 1
M_005	The student is able to construct decision support systems on the Genie platform based on ordinary and dynamic Bayesian networks, can implement the Java decision support system using the SMILE library.	K_U01 K_U05	1 1

		K_U08	1
		K_U09	1
		K_U10	1
M_006	he student is able to construct complex decision support systems implemented using the KNIME package, including time series prediction.	K_U01	1
		K_U05	1
		K_U08	1
		K_U09	1
		K_U10	1

### 3. Module description

<b>Description</b>	The aim of the course is to prepare students for the design and implementation of decision support systems. In addition to the theoretical foundations, the student gains the ability to implement practical systems supporting decisions in the fields of banking, commerce and other.
<b>Prerequisites</b>	

### 4. Assessment of the learning outcomes of the module

code	type	description	learning outcomes of the module
W_001	Solving decision problems.	Solution of three theoretical tasks, also of a computational nature.	M_001, M_002, M_003
W_002	Design and implementation of a decision support system.	Implementation of the decision support system using the selected platform: 1) Genie / SMILE 2) KNIME	M_004, M_005, M_006

### 5. Forms of teaching

code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Lecture in form of the slides presentation.	15	Study of lecture notes, compulsory and supplementary literature.	15	W_001, W_002
Z_002	laboratory classes	During classes, the lecturer presents and discusses examples of decision support systems implemented in Genie, QGenie and KNIME. Students independently develop the systems indicated by the teacher. students implement two decision support systems on the Genie/SMILE and KNIME toolkits.	30	Students implement two decision support systems based on the GENIE / SMILE and KNIME toolkits.	60	W_001, W_002

**Module:** Techniques for optimizing computer programs

**Module code:** W4-IN-N2-20-F-TOPK

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Has knowledge of the ways in which computations are made in modern computers and how they impact the overall computation time.	K_K01 K_U05 K_U09 K_W02	1 1 1 1
M_002	Has knowledge of programming techniques and tools that allow better use of the computing power offered by modern computers.	K_U01 K_U09 K_W02 K_W03 K_W04	1 1 1 1 1
M_003	Is able to use tools that facilitate diagnostics of performance-related problems in computer programs.	K_U01 K_U05 K_W02 K_W03	1 1 1 1
M_004	He can choose algorithms and data structures to improve the efficiency of computations.	K_U05 K_U09 K_W02 K_W04	1 1 1 1

3. Module description	
<b>Description</b>	The module aims to familiarize students with methods of optimizing the performance of computer programs. Both programming tools and algorithmic solutions will be discussed, taking into account the architecture of modern computers.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Final test.	Students are tested on the knowledge gained during lectures and laboratory classes. The test consists of a number of closed and (optionally) open questions.	M_001, M_002, M_004
W_002	Midterm test.	At least one test assessing the knowledge gained by students during laboratory classes.	M_001, M_002, M_003, M_004
W_003	Programming assignment.	Optional programming assignments verifying the skills acquired during the course.	M_001, M_002, M_003, M_004

5. Forms of teaching						
code	form of teaching			required hours of student's own work		assessment of the learning outcomes of the module
	type	description (including teaching methods)	number of hours	description	number of hours	
Z_001	lecture	Presentation of the course material in spoken and written forms, supplemented with multimedia content. Emphasizing issues that are more difficult to understand and have deeper theoretical foundations. Engaging listeners by asking questions about the content presented.	15	Reading recommended books and articles. Analysis and repetition of lecture content. Preparation for the final test.	30	W_001, W_002, W_003
Z_002	laboratory classes	Preparation of students to apply the knowledge in programming practice through the presentation of sample programs and programming tools. Discussion of methodology with indication of key steps for the detection, analysis and resolution of performance problems in computer programs.	30	Working on assignments. Studying the recommended literature.	45	W_002, W_003

<b>1. Field of study</b>	<b>Computer Science</b>
2. Faculty	Faculty of Science and Technology
3. Academic year of entry	2021/2022 (summer term), 2022/2023 (winter term)
4. Level of qualifications/degree	second-cycle studies

6. Mode of study	part-time

**Module:** The concept of programming languages

**Module code:** W4-IN-N2-20-F-KJP

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	The student is familiar with the programming paradigms: procedural programming, object-oriented programming, structured programming, concurrent programming, imperative, functional and declarative programming and their relation to the computer architecture (including parallel and multiprocessor programming).	K_W02 K_W04	1 1
M_002	The student understands basic programming constructions and knows the data types of imperative languages and programming constructions characteristic for declarative and functional approaches.	K_W04 K_W05	1 1
M_003	The student has knowledge concerning the implementation of mechanisms characteristic for a particular programming paradigm in particular programming languages.	K_W02 K_W04 K_W08 K_W09	1 1 1 1
M_004	The student is able to construct a solution to a given problem according to a specific programming paradigm and program it in the chosen programming language.	K_U01 K_U02 K_U03	1 1 1
M_005	The student is able to apply object-oriented, structured, functional and declarative approaches in particular programming languages.	K_U01 K_U02 K_U03	1 1 1
M_006	The student is able to verify the reliability of a computer program by means of testing in the given programming environment and document the program.	K_U01 K_U02 K_U04	1 1 1

		K_U09	1
M_007	The student can work in a project-programming team	K_K01	1
		K_K03	1
		K_K05	1

<b>3. Module description</b>	
<b>Description</b>	The aim of the course is to supplement students' knowledge of the principles of designing and implementing computer programs in selected languages representing an imperative, functional and declarative approach. Students develop their knowledge and skills in applying various programming paradigms, learning the concepts of programming languages characteristic for these paradigms.
<b>Prerequisites</b>	

<b>4. Assessment of the learning outcomes of the module</b>			
code	type	description	learning outcomes of the module
W_001	Evaluation of presentation and computer implementation	Students develop their own software, the specification of which is given by the teacher, and make presentations on a chosen topic from the given list.	M_001, M_002, M_003, M_004, M_006, M_007

**Module:** Web applications

**Module code:** W4-IN-N2-20-F-AI

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
<b>code</b>	<b>description</b>	<b>learning outcomes of the programme</b>	<b>level of competence (scale 1-5)</b>
M_001	Characterizes applications in the client-server architecture - in particular Internet ones, lists the most important elements of the multi-layer structure of this type of application	K_W03 K_W05	1 1
M_002	Defines the concept of network application and application server, characterizes the application requirements for implementation on servers based on various technologies	K_W03 K_W06	1 1
M_003	Distinguishes and describes elements of internet technologies on the selected platform	K_W05 K_W06	1 1
M_004	Characterizes the rules of connecting and using relational database servers in Internet technologies	K_W06 K_W09	1 1
M_005	Describes the structure of the MVC (Model-Viewer-Controller) application - especially in the context of creating database web applications	K_W05	1
M_006	Uses programming environments to create internet projects, creates applications divided into packages / modules, applies appropriate comments	K_U01 K_U03 K_U09	1 1 1
M_007	Creates controllers (request handling objects), handles requests based on the Get and Post methods, installs a network application on the application server and configures the server in the basic scope	K_U01 K_U02 K_U08 K_U09 K_U10	1 1 1 1 1

M_008	Creates web applications based on the selected technology, uses component libraries, uses cookie and session mechanisms	K_K01 K_K02 K_U01 K_U02 K_U09 K_U10	1 1 1 1 1 1
M_009	Uses libraries / modules for communication with the database to implement the data layer, designs and manages the connection to the database from the level of the application itself and the application server	K_U01 K_U09 K_U10	1 1 1
M_010	Uses the MVC (Model-View-Controller) model in database projects created in the selected technology	K_U09 K_U10	1 1
M_011	Is able to work independently, planning the implementation of assigned tasks	K_K01	1

3. Module description	
<b>Description</b>	Aim of the class is gaining a practical basics in development of web applications in the chosen technology (PHP, Java, ASP .NET, Ruby, Python or other). Through practical laboratory class and project development, the students acquire knowledge, skills and competences related to the subject. When the classes are completed, the students should be able to design a web application using database, implement it and deploy on a web server.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Test	Answers to several questions selected from the thematic groups covering all the sections discussed in class.	M_001, M_002, M_003, M_004, M_005
W_002	Thematic tasks	Implementation of thematic tasks during the labs.	M_006, M_007, M_008, M_009, M_010, M_011

**Module:** Wireless and sensor networks

**Module code:** W4-IN-N2-20-F-SBiS

**1. Number of the ECTS credits:** 4

<b>2. Learning outcomes of the module</b>			
code	description	learning outcomes of the programme	level of competence (scale 1-5)
M_001	Student has skills for wireless network design.	K_U03 K_U04 K_W03	1 1 1
M_002	Student has knowledge of ad-hoc and sensor network architecture and communication protocols.	K_W03 K_W05	1 1
M_003	Student has ability to implement the concepts in real world wireless network applications.	K_K01 K_U08 K_W02	1 1 1

### **3. Module description**

<b>Description</b>	The module objective is to give students a knowledge of the ad-hoc and sensor networks that are based on wireless technology, with special attention on their construction and applications. The presented topics are related to components of the wireless networks, energy-efficient standards of data transmission, routing protocols, dedicated operating systems, programming languages, and principles of adopting the network node architecture to specific requirements. Students will gain the abilities to design and configure the wireless networks.
<b>Prerequisites</b>	

4. Assessment of the learning outcomes of the module			
code	type	description	learning outcomes of the module
W_001	Final test	Two-hour test with closed and open questions.	M_001, M_002
W_002	Reports	Presentation of the reports and discussion of the developed projects.	M_001, M_003
