7.	General information about the module	
Module name		Administrative court proceedings
Module code		post_sadowoadm_06
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		The module "Administrative court proceedings" aims to familiarize students with the principles and legal institutions of administrative court proceedings and the Polish model of the administrative court system. It includes an analysis of the basic principles of this procedure, including constitutional principles. It discusses the static issues of administrative court proceedings and their dynamics. Particular emphasis is placed on the problems of the scope of the subject-matter jurisdiction of administrative courts, the issues of the conditions for the admissibility of a complaint to the provincial administrative court, the types of judgments issued by the provincial administrative court, and the principles and procedure for filing appeals against judgments of provincial administrative courts.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competence (scale 1-5)	
admin_p_03_1	Knows and understands the nature and basic constructs of administrative court proceedings.	K_W08	2	
admin_p_03_2	Knows and identifies the constitutional principles of administrative court proceedings.	K_W07 K_W08	1 2	
admin_p_03_3	Recognizes the sources of the law of administrative procedure.	K_W07	3	
admin_p_03_4	Uses in practice a comprehensive knowledge of administrative court proceedings, preparing a position, based on relevant sources, including laws and literature.	K_U09	3	
admin_p_03_5	Is ready to balance the interests of the individual and the public in the framework of administrative litigation, performing one's professional tasks and upholding the ethos of a lawyer.	K_K06	4	
admin_p_03_6	Identifies the interests of individuals and public administration bodies within the framework of administrative court proceedings.	K_K02	3	

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching					
Code	Name	Number of hours	Assessment of the learning outcomes of the module	Learning outcomes of the module	Methods of conducting classes
post_sadowoadm_1	lecture	20	exam	admin_p_03_1, admin_p_03_2, admin_p_03_3, admin_p_03_5	a01
post_sadowoadm_2	practical classes	14	course work	admin_p_03_2, admin_p_03_3, admin_p_03_4, admin_p_03_5, admin_p_03_6	b03, b04, b06, b07, b08, b09, d02, f02

11. The student's work, apart from participation in classes, includes in particular:			
Code	Category	Name (description)	Is it part of the BUNA?
a01	Preparation for classes	Search for materials and review activities necessary for class participation <i>reviewing literature, documentation, tools and materials as well as the specifics of the syllabus and the range of activities indicated in it as required for full participation in classes</i>	No
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>	No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>	No
a04	Preparation for classes	Consulting materials complementary to those indicated in the syllabus <i>agreeing on materials complementary to those indicated in the syllabus, supporting the implementation of tasks resulting from or necessary for class participation</i>	Yes
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>	No
b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>	No
b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>	No
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as</i>	No

		<i>well as from the notes or other materials/artifacts made in class</i>	
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)

7.	General information about the module	
Module name		Administrative proceedings
Module code		post_admin_05
Number of the ECTS credits		6
Language of instruction		Polish
Purpose and description of the content of education		The "Administrative Proceedings" module aims to familiarize the student with the principles and legal institutions of general administrative proceedings and simplified administrative proceedings. It includes a detailed analysis of the general principles of administrative proceedings, i.e. the basic procedural values. It shows the basic institutions and legal structures of administrative proceedings, both dynamic and static. The basic element of the presentation is the concept of a procedural action, the structured catalogue of which sets the boundaries of administrative proceedings.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
admin_p_02_1	Knows the nature and basic constructs of administrative general proceedings.	K_W08	4	
admin_p_02_2	Knows and understands the basic principles of general administrative procedure.	K_W06	2

5.	Degree profile	general academic
6.	Mode of study	part-time

7.	General information about the module	
Module name		Agricultural law
Module code		pr_rol_08
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		<p>The aim of the module is to present the most current issues in agricultural law from a dynamic perspective. This approach is intended to familiarize the student with the transformation process of the Polish agricultural law system and its adaptation to European Union legislation.</p> <p>As part of the course, the student becomes acquainted with key legal solutions in force within the common EU legislation, and also learns about regulations functioning in individual EU member states—insofar as they set developmental trends for future EU legislation. Due to the lack of stabilized legal structures in the current Polish agricultural law, the course does not limit itself to analyzing the present legal state but also considers the foreseeable directions of agricultural law development.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competence (scale 1-5)	
roigp_p_01_1	Knows and understands the basic concepts of agricultural law.	K_W08	1	
roigp_p_01_2	Knows and understands the legal, professional and social status of the farmer.	K_W09	3	
roigp_p_01_3	Recognises the instruments of law for restricting the marketing of agricultural real estate.	K_U04	1	
roigp_p_01_4	Knows and understands the legal measures to protect agricultural and forest land.	K_W02	2	
roigp_p_01_5	Recognises the basic legal principles for the formation and operation of agricultural markets.	K_U02	3	
roigp_p_01_6	Knows the basic legal and financial instruments in agriculture.	K_W06	2	
roigp_p_01_7	Knows the basic principles of European food law.	K_W13	2	
roigp_p_01_8	Analyses the developments in agricultural law and their impact on the shape of Polish agriculture and agricultural law.	K_K02	1	

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
c07	Demonstration methods	Screen presentation <i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points, charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

7.	General information about the module	
Module name		Bankruptcy and restructuring proceedings
Module code		K4_post_upad_i_re 09
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		The aim of the module is to familiarize participants with the principles and mechanisms of insolvency proceedings, including bankruptcy and restructuring procedures, which serve as responses to insolvency or the threat thereof. The module aims to demonstrate the importance of protecting the interests of both creditors and debtors, with particular emphasis on the differences between the liquidation-oriented nature of bankruptcy proceedings and the restructuring approach focused on the continuation of the debtor's business through an arrangement with creditors. Additionally, the module covers the specifics of bankruptcy proceedings for natural persons, i.e., consumer bankruptcy.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme		Level of competenc (scale 1-5)
post_upad_01	Is ready to speak on topics related to bankruptcy and restructuring and their consequences, and in a professional and ethical manner representing participants in these proceedings.	K_K01		3
		K_K07		4
post_upad_02	Can define the legal consequences of insolvency or threatened insolvency and prepare opinions, positions and conclusions, as well as possible resolutions in this regard.	K_U10		5
post_upad_03	Is ready to conduct a legal analysis of situations related to bankruptcy and restructuring proceedings, taking into account the individual and collective interests of their participants and the public interest, with particular emphasis on protecting economic stability, creditors' rights and preserving employment.	K_K02		4
post_upad_04	Can estimate, selecting relevant sources and information, when there are reasons for initiating bankruptcy proceedings and one of the four restructuring proceedings, and what is the legal relation between these proceedings.	K_U05		4
post_upad_05	Is competent in assessing problems in bankruptcy and restructuring proceedings, leading a team, collaborating, acting as an expert witness and representing parties in restructuring and bankruptcy proceedings.	K_U03		4
		K_U12		5
post_upad_06	Knows and understands the basic concepts, objectives and functions of bankruptcy and restructuring law, including the differences between bankruptcy and restructuring proceedings and their legal consequences for entrepreneurs and creditors.	K_W10		5

post_upad_07	Knows and understands to a deeper degree the specialist terminology and structure of legal norms on restructuring and bankruptcy proceedings, is able to explain the principles of their functioning in the legal system and analyze the prerogative, course and consequences of these proceedings for the participating entities.	K_W03	4

7.	General information about the module	
Module name		Civil enforcement proceedings
Module code		K3_post_egz_cyw 09
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		<p>The aim of the module is to discuss enforcement proceedings. Judicial enforcement is the culmination of the realization of the right to a court. Particular emphasis will be placed on practical aspects.</p> <p>Enforcement proceedings sensu largo include not only the enforcement phase itself but also the writ-of-execution phase, notarial deeds, and European enforcement orders. The course will cover the structure of enforcement proceedings, including the enforcement procedure itself and the various types of enforcement.</p> <p>A key issue is the broad concept of protecting subjective and procedural rights within enforcement proceedings, which encompasses appeal measures and anti-enforcement actions (such as oppositional lawsuits). The legal position of the court bailiff is also of importance, including their financial liability, powers, and competences.</p>

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
cywil_p_03_1	Has knowledge of the sources of property law and knowledge of its functions, as well as the interaction between property law and other areas of civil law.	K_W07	3	
cywil_p_03_2	Has knowledge of the institutions and legal constructions developed in property law.	K_W08	2	
cywil_p_03_3	Understands of the subject matter of the regulation of property law, in particular the range of rights and obligations of the subjects of the law and the competence of the addressees of the law in this area of civil law.	K_W10	3	
cywil_p_03_4	Is familiar with the differences in the basic regulation of property law, international standards in this field, as well as the social conditions related to the creation and application of regulations.	K_W13	2	
cywil_p_03_5	Has the ability to find the relevant legal regulation in the field of substantive law and to interpret the relevant regulations and to draw conclusions as to the acceptable or required procedure in cases in this field.	K_U04	1	
cywil_p_03_6	Has the ability to find judicial decisions and statements of doctrine relating to the given facts, to assess their relevance to the case and to predict possible outcomes.	K_U05	2	

cywil_p_03_7	Uses both the dogmatic method and the historical and legal-comparative method in formulating opinions, conclusions and proposed solutions to problems in property law.	K_U07	4
cywil_p_03_8	Is prepared to communicate to the public on matters of property law, including non-experts in the field, conveying own views with reasons.	K_K01	3

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
c07	Demonstration methods	Screen presentation <i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points,</i>

		<i>charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching

d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	No
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)
4.	Level of qualifications/degree	long-cycle studies
5.	Degree profile	general academic
6.	Mode of study	part-time

7.	General information about the module	
Module name		Civil law - general part
Module code		pr_cyw_cz_ogol_02
Number of the ECTS credits		6
Language of instruction		Polish
Purpose and description of the content of education		The module covers the most important issues of the general part of civil law. It is designed to familiarize the student with the basic principles and institutions of civil law, without which it is impossible to study other subjects of civil (private) law and private international law. It covers introductory issues, i.e.: the concept and principles of civil law, sources of law, types of legal norms. Subsequently, within this subject are considered: subjects of civil law, i.e. natural persons, legal persons and organizational units without legal personality, but endowed with legal capacity (with particular emphasis on the personal property of civil law subjects), objects of civil law relations and subjective rights, as well as rights on intangible property and their protection. The subject matter further includes: legal events and legal actions (in particular, unilateral declaration of will, contracts), conclusion of a contract, interpretation of a declaration of will, prerequisites for the validity of a legal action, i.e. (in addition to legal capacity): form of legal actions, defects in will declarations, content of legal actions filling in the gaps and limits of the parties' freedom in shaping the content of legal actions, sanctions of defective legal actions, the problem of antiquity . Within the framework of representation, statutory representation, power of attorney and proxy are discussed.

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
cywil_p_01_1	Knows and understands the concept and principles of civil law, the sources of civil law, their relations to each other, and the types of legal norms found in civil law.	K_W07	3	
cywil_p_01_2	Has knowledge of civil law subjects, their characteristics, rights and obligations as defined by civil law.	K_W10	3	
cywil_p_01_3	Knows and understands the concepts, institutions and legal constructions covered by the so-called general part of civil law, in particular concerning: subjects of civil law, objects of civil law relations, civil law events, legal actions, representation and past.	K_W08	2	
cywil_p_01_4	Is able to use the concepts, institutions and legal constructions covered by the so-called general part of civil law using appropriate techniques and tools.	K_U04	2	
cywil_p_01_5	Is able to analyse given legal problems from the so-called general part of civil law arising in fictional actual situations.	K_U03	3	

cywil_p_01_6	Recognises the need to make use of legal databases, dogmatic literature and case law in the legal analysis of specific actual situations.	K_U09	3
cywil_p_01_7	Is ready to critically evaluate and update his own knowledge in relation to the following legal developments, and to make use of expert knowledge.	K_K08	3

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
c07	Demonstration methods	Screen presentation <i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points, charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

11. The student's work, apart from participation in classes, includes in particular:				
Code	Category	Name (description)		Is it part of the BUNA?
a01	Preparation for classes	Search for materials and review activities necessary for class participation <i>reviewing literature, documentation, tools and materials as well as the specifics of the syllabus and the range of activities indicated in it as required for full participation in classes</i>		No
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>		No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>		No
a04	Preparation for classes	Consulting materials complementary to those indicated in the syllabus <i>agreeing on materials complementary to those indicated in the syllabus, supporting the implementation of tasks resulting from or necessary for class participation</i>		Yes
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>		No
b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>		No
b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>		No
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>		No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as</i>		No

		<i>well as from the notes or other materials/artifacts made in class</i>	
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

7.	General information about the module	
Module name		Civil law - part obligations - part I
Module code		pr_cyw_zob_1 03
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		The civil law module - the obligation part includes selected, most important issues of the general part and the detailed part of obligations. Its aim is to familiarize the student with the law of obligations to a degree that goes beyond the knowledge of the basic principles and institutions of the law of obligations. The knowledge acquired in this subject is also very important for understanding the institutions of civil law discussed outside the scope of the law of obligations (property law, family law, inheritance law, private international law). The module aims to familiarize the student with the fundamental institutions of the law of obligations. It includes in particular such issues as: the concept of obligation, sources of obligations, the concept and types of performance, debt and liability, contracts, their types, content, principles regarding the performance and effects of non-performance of obligations, torts, unjust enrichment, reasons for the termination of the obligation relationship and changes in the subject. The detailed part of obligations includes: statutory types of contracts and selected unnamed contracts. As part of the statutory types of contracts, selected contracts from individual groups of contracts are usually discussed. This includes: agreements on the transfer of rights (e.g. sales agreement), agreements on the use of things (e.g. lease, tenancy and leasing agreement), agreements on the provision of services (e.g. contract of mandate, agency and commission), license agreements and agreements on the transfer of copyright property rights, as well as a company agreement, insurance agreement, bank surety and guarantee, transfer. The lecture may also include basic knowledge on securities and legitimizing signs.

Module name		Civil law - part obligations - part II
Module code		pr_cyw_zob_1 04
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		<p>The "Civil Law – Law of Obligations" module covers selected key issues from both the general and specific parts of the law of obligations. Its aim is to familiarize students with the law of obligations at a level exceeding basic knowledge of its principles and institutions. The knowledge gained in this course is also essential for understanding institutions of civil law addressed outside the scope of obligations law (property law, family law, inheritance law, and private international law).</p> <p>The module is designed to introduce students to the fundamental institutions of the law of obligations. It includes, in particular, the following issues: the concept of obligation, sources of obligations, the concept and types of performance, debt and liability, contracts—their types, content, rules of performance, and consequences of non-performance of obligations—torts, unjust enrichment, causes of extinction of obligations, and changes in parties to the obligation.</p> <p>The specific part of the obligations law includes statutory types of contracts and selected innominate (non-statutory) contracts. Typically, the course covers selected contracts from various categories, such as:</p> <ul style="list-style-type: none"> - contracts for the transfer of rights (e.g. sales contract), - contracts for the use of things (e.g. lease, tenancy, and leasing contracts), - contracts for the provision of services (e.g. mandate, agency, and commission contracts), - licensing agreements and contracts for the transfer of proprietary copyrights, - as well as partnership agreements, insurance contracts, suretyship and bank guarantee, and bill of exchange. <p>The lecture may also include basic information on securities and bearer documents.</p>

b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>	No
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class</i>	No
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)
4.	Level of qualifications/degree	long-cycle studies
5.	Degree profile	general academic
6.	Mode of study	part-time

7.	General information about the module	
Module name		Civil procedure - part I
Module code		pos_cyw_07
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		<p>The aim of the module is to present the basic issues and institutions in the field of civil proceedings, including the procedural procedure, general issues of non-contentious proceedings and the basics of enforcement proceedings.</p> <p>The program content includes, in particular, the analysis of:</p> <ul style="list-style-type: none"> Concepts of civil procedure and civil case Sources of civil proceedings Admissibility of court proceedings Of the General Principles of Civil Procedure Procedural rationale Entities in civil proceedings Subject-matter of the civil proceedings Proceedings before the court of first instance Evidence and taking of evidence Court decisions, Appeals Extraordinary Remedies of Enforcement and Enforcement Orders Types of enforcement, means of appeal in the course of enforcement proceedings and counter-execution actions.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competence (scale 1-5)	
poscy_1_01	Knows the basic system and organizational principles of civil procedure authorities.	K_W06	2	
poscy_1_02	Knows and can identify the sources of civil procedure law and their relationships.	K_W07	3	
poscy_1_03	Knows the basic legal institutions of civil procedural and non-procedural, executive proceedings, as well as their development trends.	K_W08	1	
poscy_1_04	Knows and understands the statics and dynamics of civil proceedings.	K_W11	1	

poscy_1_05	Knows how to solve problems related to the interpretation of the basic regulations of civil procedure law using relevant techniques and tools.	K_U04	3
poscy_1_06	Is able to apply the basic principles of civil procedure in practice.	K_U08	2
poscy_1_07	Knows how to propose court decisions using relevant regulations of civil procedure, also acting in a team or directing its work.	K_U12	3
poscy_1_08	Demonstrates the ability to actively participate in civil judicial proceedings.	K_K05	2

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b05	Problem-solving methods	Activating method – seminar / proseminar <i>a seminar method; usually an oral presentation of a previously studied/diagnosed problem delivered on a forum; it aims at provoking a discussion concerning the results of research work; a type of conference, course or training session modelled on seminar classes</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

7.	General information about the module	
Module name		Clinic law
Module code		kl_pr_08
Number of the ECTS credits		2
Language of instruction		Polish
Purpose and description of the content of education		<p>The Legal Clinic is a workshop-based module comprising various classes aimed at deepening and consolidating knowledge in a selected area of law, and above all, at acquiring practical skills in applying specific legal regulations. The essence of the module lies in the active participation of students in solving legal problems based on real or hypothetical factual scenarios, under the academic supervision of the course instructor.</p> <p>Depending on the main theme of the workshops, students participate in study visits to selected public institutions, as well as in simulations of trials, hearings, mediations, or negotiations. Individually or in teams, they carry out project tasks such as preparing solutions to legal issues, drafting legal advice, creating simulation scripts, or developing plans for research projects or academic articles.</p>

7.	General information about the module	
Module name		Commercial law - part I
Module code		pr_hand_07
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		<p>The module is designed to discuss commercial law and its place within the system of applicable law.</p> <p>The aim of the module is to familiarize students with the basic principles of conducting economic activity and the legal forms in which it can be carried out. It is assumed that the student will become acquainted with the specifics of entities operating in commercial transactions and the rules for exercising rights by participants in the market. Another objective is to introduce students to typical contracts used in professional business transactions.</p>

ph_1_01	Has knowledge of the sources of company law, business contracts, securities, industrial property.	K_W07	3	
ph_1_02	Has knowledge of the legal institutions and legal constructions of commercial law and their development trends.	K_W08	3	
ph_1_03	Has an orientation to the subject matter of commercial law regulation, the system and functioning of entrepreneurs.	K_W10	2	
ph_1_04	Is able to interpret the rules applying to the structures and institutions of commercial law.	K_U04	4	
ph_1_05	Is able to find factually relevant individual decisions on commercial law, critically evaluate them and propose an own solution to the problem.	K_U05	1	
ph_1_06	While preparing a standpoint on a specific issue relating to commercial law, is able to make use of literature, legal databases, case law.	K_U09	3	
ph_1_07	Is ready to analyse events and phenomena in business transactions.	K_K01	2	
ph_1_08	Is prepared to create contracts, apply commercial and economic institutions.	K_K05	5	
ph_1_09	Knows and understands in depth the commercial law regulations governing business activities, including their own professional activities, enabling them to plan their own development and create and develop various forms of	K_W12	5	

entrepreneurship.

9. Methods of conducting classes

Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
c07	Demonstration methods	Screen presentation <i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points, charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching					
Code	Name	Number of hours	Assessment of the learning outcomes of the module	Learning outcomes of the module	Methods of conducting classes

11. The student's work, apart from participation in classes, includes in particular:			
Code	Category	Name (description)	Is it part of the BUNA?
a01	Preparation for classes	Search for materials and review activities necessary for class participation <i>reviewing literature, documentation, tools and materials as well as the specifics of the syllabus and the range of activities indicated in it as required for full participation in classes</i>	No
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>	No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>	No
a04	Preparation for classes	Consulting materials complementary to those indicated in the syllabus <i>agreeing on materials complementary to those indicated in the syllabus, supporting the implementation of tasks resulting from or necessary for class participation</i>	No
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>	No
b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>	No
b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>	No
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class</i>	No

c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	No
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)
4.	Level of qualifications/degree	long-cycle studies
5.	Degree profile	general academic
6.	Mode of study	part-time

7.	General information about the module	
Module name		Commercial law - part II
Module code		pr_hand_08
Number of the ECTS credits		6
Language of instruction		Polish
Purpose and description of the content of education		<p>The module is designed to discuss commercial law and its role within the system of applicable law.</p> <p>The objective of the module is to familiarize students with the fundamental principles of conducting business activity and the legal forms through which it can be carried out. It is assumed that the student will gain an understanding of the specifics of entities operating in commercial transactions and the rules for exercising rights by market participants. Another aim is to acquaint students with typical contracts used in professional commerce.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
ph_2_01	Has knowledge of the sources of company law, business contracts, securities, industrial property.	K_W07	4	
ph_2_02	Has knowledge of the legal institutions and legal constructions of commercial law and their development trends.	K_W08	1	
ph_2_03	Has an overview of the subject matter of commercial law regulation, the system and functioning of entrepreneurs.	K_W10	4	
ph_2_04	Is able to interpret the rules applicable to commercial law structures and institutions.	K_U04	2	
ph_2_05	Is able to find factually relevant individual decisions on commercial law, critically evaluate them and propose own solutions to the problem.	K_U05	3	
ph_2_06	While preparing a standpoint on a specific issue relating to commercial law, is able to make use of literature, legal databases, case law.	K_U09	4

7.	General information about the module	
Module name		Constitutional Law Part I
Module code		pr_kon_02
Number of the ECTS credits		6
Language of instruction		Polish
Purpose and description of the content of education		<p>The aim of the module is for students to acquire knowledge, skills, and social competences related to the academic discipline of constitutional law. This refers to the broadly understood domain of the functioning of state authority (state system). The module focuses on the principles and structure of constitutional arrangements in force in Poland, but it presents them in a broad comparative legal context, including solutions typical for EU member states and the United States of America.</p> <p>The acquired knowledge is intended to enable students to understand the role of the constitution in shaping the state's order, including its influence on political processes and the position of the individual within the state. The skills gained should allow students to apply constitutional law instruments in their professional (legal) practice. The social competences developed through the module are meant to equip students to independently analyze events, phenomena, and social situations related to the functioning of the so-called public domain.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competence (scale 1-5)	
konst_p_1_01	Knows and understands the basic concepts of constitutional law.	K_W03	3	
konst_p_1_02	Is familiar with the constitutional tradition of the Republic of Poland in the 20th century.	K_W02	2	
konst_p_1_03	Identifies and knows the sources of constitutional law with particular reference to the Constitution.	K_W07	4	
konst_p_1_04	Analyses political processes relevant to the realisation of the objectives of constitutional law.	K_K02	3	
konst_p_1_05	Knows and understands the principles and content of the system of rights and liberties and duties in the RP.	K_W10	2	
konst_p_1_06	Can apply human rights instruments using appropriate techniques and tools and recognises their specificities.	K_U04	2	
konst_p_1_07	Knows and understands the model of the political system of the Republic of Poland, in particular the exercise of power at the central level, taking into account the comparative context on a European and US scale.	K_W05	4

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
a05	Lecture methods / expository methods	Explanation/clarification <i>explication involving the derivation of a predetermined theorem from other, already known ones, in the number of steps specified by the person teaching the course</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching					
Code	Name	Number of hours	Assessment of the learning outcomes of the module	Learning outcomes of the module	Methods of conducting classes
pr_kon_01	lecture	20	exam	konst_p_2_01, konst_p_2_02, konst_p_2_03, konst_p_2_05, konst_p_2_07, konst_p_2_08	a01

11. The student's work, apart from participation in classes, includes in particular:			
Code	Category	Name (description)	Is it part of the BUNA?
a01	Preparation for classes	Search for materials and review activities necessary for class participation <i>reviewing literature, documentation, tools and materials as well as the specifics of the syllabus and the range of activities indicated in it as required for full participation in classes</i>	No
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>	No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>	No
a04	Preparation for classes	Consulting materials complementary to those indicated in the syllabus <i>agreeing on materials complementary to those indicated in the syllabus, supporting the implementation of tasks resulting from or necessary for class participation</i>	Yes
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>	No
b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>	No
b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>	No
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class	No

		<i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class</i>	
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	No
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)

7.	General information about the module	
Module name		Criminal law - part I
Module code		pr_pk_03
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		The aim of the module is to provide students with knowledge about the specific nature of criminal law as a branch of repressive law (both in terms of its normative dimension and its social significance). This requires presenting the fundamental regulations of criminal law, along with examples of its practical application—resulting in the student's ability to subsume factual situations and independently assess individual institutions of criminal law.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
karne_p_1_01	Is familiar with the evolution of criminal law institutions, schools and directions in criminal law.	K_W02	1	
karne_p_1_02	Knows the consequences of the principle of determinacy against the background of the catalogue of sources of criminal law shaped in the provisions of the Constitution of the Republic of Poland and has knowledge of the other principles of criminal law and their consequences.	K_W07	2	
karne_p_1_03	Has knowledge of the specificity of the construction of criminal law norms and the distinctiveness of the principles of interpretation of criminal law provisions.	K_W03 K_W04	2 2	
karne_p_1_04	Is familiar with the concept of crime and all the institutions of the General Part of the Penal Code applicable to typifications contained in the Special Part of the Penal Law and outside the Penal Code.	K_W10	3	
karne_p_1_05	Is familiar with the challenges, as well as the dilemmas related to the application of regulations in the field of juvenile proceedings, violation law, the Fiscal Penal Code and the Law on Liability of Collective Entities, as well as extra-code criminal law.	K_W11	2	
karne_p_1_06	Is able, on the basis of possessed knowledge of the science of penal measures, to make a decision in accordance with the model of rational penal policy, and to justify one's position by taking part in and directing the debate.	K_U11	2	
karne_p_1_07	Has the ability to identify criminal law institutions that apply to a specific factual situation and to determine the consequences thereof.	K_U04	2	

karne_p_1_08	Is able to make independent judgements as to the advantages and disadvantages of specific normative solutions (including those relating to criminalisation and its modalities).	K_U07 K_U09	2 2
karne_p_1_09	Has the ability to solve theoretical and practical problems in the field of criminal law by working in a team, directing the work of the team, and acting as an expert.	K_U02 K_U12	2 2
karne_p_1_10	Is prepared to critically assess and justify proposed solutions to facts and case-studies, drawing on the latest legal developments as well as using an expert opinion.	K_K08	2

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
a03	Lecture methods / expository methods	Description <i>a description of objects, phenomena, processes or people; it involves specifying the structure and characteristic features of the object, phenomenon, or process being described; it is usually accompanied by a demonstration of the described object or by its models, drawings, tables, charts, etc.; a description may take the form of an explanation, classification, justification or comparison</i>
a05	Lecture methods / expository methods	Explanation/clarification <i>explication involving the derivation of a predetermined theorem from other, already known ones, in the number of steps specified by the person teaching the course</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>

e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching

11. The student's work, apart from participation in classes, includes in particular:			
Code	Category	Name (description)	Is it part of the BUNA?
a01	Preparation for classes	Search for materials and review activities necessary for class participation <i>reviewing literature, documentation, tools and materials as well as the specifics of the syllabus and the range of activities indicated in it as required for full participation in classes</i>	No
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>	No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>	No
a04	Preparation for classes	Consulting materials complementary to those indicated in the syllabus <i>agreeing on materials complementary to those indicated in the syllabus, supporting the implementation of tasks resulting from or necessary for class participation</i>	Yes
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>	No
b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>	No
b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to</i>	No

		<i>optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>	
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class</i>	No
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)
4.	Level of qualifications/degree	long-cycle studies
5.	Degree profile	general academic
6.	Mode of study	part-time

7.	General information about the module	
Module name		Criminal law - part II
Module code		pr_pk_04
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		The aim of the module is to provide the student with knowledge about the specific nature of criminal law as a branch of repressive law (both in its normative dimension and in terms of its social significance). This requires presenting the fundamental regulations of criminal law, including examples of its application in practice. As a result of this process, the student acquires the ability to subsume factual situations under relevant legal norms and to independently evaluate specific institutions of criminal law.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
karne_p_2_01	Is familiar with the evolution of criminal law institutions, schools and directions in criminal law.	K_W02	3	
karne_p_2_02	Knows the consequences of the principle of determinacy against the background of the catalogue of sources of criminal law shaped in the provisions of the Constitution of the Republic of Poland and has knowledge of the other principles of criminal law and their consequences.	K_W07	3	
karne_p_2_03	Has knowledge of the specifics of the construction of criminal law norms and the distinctiveness of the principles of interpretation of criminal law provisions.	K_W03 K_W04	3 3	
karne_p_2_04	Is familiar with the concept of crime and all the institutions of the General Part of the Penal Code applicable to typifications contained in the Special Part of the Penal Law and outside the Penal Code.	K_W10	3	
karne_p_2_05	Is familiar with the challenges, as well as the dilemmas related to the application of regulations in the field of juvenile proceedings, violation law, the Fiscal Penal Code and the Law on Liability of Collective Entities, as well as extra-code criminal law.	K_W11	4	
karne_p_2_06	Is able, on the basis of possessed knowledge of the science of penal measures, to make a decision consistent with the model of rational penal policy, and to justify one's position by participating in and directing the debate.	K_U11	2	
karne_p_2_07	Has the ability to identify criminal law institutions applicable to a specific factual situation and to determine the consequences thereof.	K_U04	4	

karne_p_2_08	Is able to make independent judgements as to the advantages and disadvantages of specific normative solutions (including those relating to criminalisation and its method).	K_U07 K_U09	3 3
karne_p_2_09	Has the ability to solve theoretical and practical problems in the field of criminal law by working in a team, directing the work of the team, and acting as an expert.	K_U02 K_U12	4 4
karne_p_2_10	Is prepared to critically assess and justify proposed solutions to facts and case-studies, drawing on the latest legal developments as well as drawing on expert opinion.	K_K08	4

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
a03	Lecture methods / expository methods	Description <i>a description of objects, phenomena, processes or people; it involves specifying the structure and characteristic features of the object, phenomenon, or process being described; it is usually accompanied by a demonstration of the described object or by its models, drawings, tables, charts, etc.; a description may take the form of an explanation, classification, justification or comparison</i>
a05	Lecture methods / expository methods	Explanation/clarification <i>explication involving the derivation of a predetermined theorem from other, already known ones, in the number of steps specified by the person teaching the course</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>

e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

7.	General information about the module	
Module name		Criminal proceedings - part I
Module code		post_kar_05
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		The module is intended to equip students with basic knowledge regarding the activities provided for by law aimed at determining the liability of the accused for the offence he is charged with. In the course of teaching, students should be familiarized in particular with the principles governing the course of proceedings and determining the functioning of procedural bodies and other participants in criminal proceedings. The aim of teaching criminal procedure is also to provide elementary knowledge regarding civil law and procedure in the scope used in criminal proceedings (i.e. in the event of initiating a so-called additional process, pursuing claims for wrongful conviction, temporary arrest and detention). The effect of teaching is to provide students with the necessary theoretical knowledge and to provide information on the views formulated in doctrine and case law. Students should also be equipped with the ability to independently interpret procedural provisions that raise doubts. It is also necessary to develop competences to solve legal problems occurring in the context of the indicated factual situations. Teaching the ability to seek solutions for individual cases should be combined with attempts to prepare draft procedural decisions (including judgments resolving the issue of the accused's criminal liability, decisions on discontinuing proceedings, orders to schedule a main hearing).
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competence (scale 1-5)	
post_kar_1_01	Has a deep knowledge of the process as a legally defined activity aimed at detecting a crime, determining its violator and determining the consequences of the criminal act.	K_W10	2	
post_kar_1_02	Knows, understands and uses freely the nomenclature relevant to criminal procedure.	K_W03	3	
post_kar_1_03	Knows the rules that determine the course of the trial and determine the functioning of the trial authorities and other participants.	K_W08	4	
post_kar_1_04	Is able to compile knowledge of criminal procedural law and constitutional law and civil law as used in criminal procedure (i.e., on issues concerning enforcement measures and the pursuit of civil claims in criminal court).	K_U08	3	
post_kar_1_05	Is able to provide written and oral arguments for the views that formulates based on the body of case law and the doctrine of criminal procedural law.	K_U09 K_U11	3 3	

		K_U13	2
post_kar_1_06	Is able to interpret legal regulations in the area of criminal procedural law from the perspective of finding solutions to specific cases.	K_U05	4
post_kar_1_07	Is able to prepare the draft of procedural decisions, based on the knowledge of criminal procedure, justifying own position.	K_U10 K_U11	3 3
post_kar_1_08	Is ready to responsibly perform professional duties in the field of criminal trial, behave in a professional and ethical manner as a participant in the trial, as well as to take into account the rules on international cooperation, increase the area of contradictory in the trial, acceleration and economization of the proceedings.	K_K06 K_K07	2 3

b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>

d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching					
Code	Name	Number of hours	Assessment of the learning outcomes of the module	Learning outcomes of the module	Methods of conducting classes
post_kar_1	lecture	20	exam	post_kar_2_01, post_kar_2_02, post_kar_2_03, post_kar_2_04, post_kar_2_08	a01

11. The student's work, apart from participation in classes, includes in particular:			
Code	Category	Name (description)	Is it part of the BUNA?
a01	Preparation for classes	Search for materials and review activities necessary for class participation <i>reviewing literature, documentation, tools and materials as well as the specifics of the syllabus and the range of activities indicated in it as required for full participation in classes</i>	No
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>	No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>	No
a04	Preparation for classes	Consulting materials complementary to those indicated in the syllabus <i>agreeing on materials complementary to those indicated in the syllabus, supporting the implementation of tasks resulting from or necessary for class participation</i>	Yes
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>	No
b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions</i>	No

		<i>for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>	
b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>	No
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class</i>	No
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)
4.	Level of qualifications/degree	long-cycle studies
5.	Degree profile	general academic
6.	Mode of study	part-time

7.	General information about the module	
Module name		Discussion Class 1
Module code		kon_06
Number of the ECTS credits		3
Language of instruction		Polish
Purpose and description of the content of education		The module is conducted in the form of a conversation course, which allows for active participation in class. During the course of the course, the student is provided with a quantum of knowledge on the chosen topic and information on how to search for sources necessary to solve a scientific problem or to present a particular issue. During the course of classes, students may present prepared papers, solve (together or separately) case studies, participate in simulations or quasi-workshop activities.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
wpia_p_kon_1	Has highly detailed knowledge in a selected field of law, including interpretative issues within that area, methods of resolving them, and the practical application of selected legal instruments and institutions, combined with selected topics from other fields, including copyright and industrial property law, also related to the creation and development of various forms of entrepreneurship.	K_W01	4	
		K_W11	4	
wpia_p_kon_2	Knows the place and significance of the discussed issues within the specific field of law in which these issues have been defined.	K_W03	4	
		K_W04	4	
		K_W07	3	
		K_W10	3	
wpia_p_kon_3	Is able to recognize, interpret, and assess social, political, and cultural phenomena from a legal perspective.	K_U02	3	
		K_U03	2	
wpia_p_kon_4	Is able to select and apply appropriate legal regulations to presented fictional and real-life events.	K_U04	1	
wpia_p_kon_5	Is prepared to communicate and defend their own views in the field of legal sciences, including among individuals who are not legal professionals.	K_K01	2	
wpia_p_kon_6	Is ready to analyze the facts, phenomena or events presented and determine their social and legal significance.	K_K02	1	

wpia_p_kon_7	Knows and understands the similarities and differences of a given issue in legal terms and in terms of auxiliary sciences for the application of law.	K_W14	4

b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>	
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>	
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>	
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>	
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>	
c07	Demonstration methods	Screen presentation <i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points, charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>	
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>	
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied</i>

11. The student's work, apart from participation in classes, includes in particular:

Code	Category	Name (description)	Is it part of the BUNA?
a01	Preparation for classes	Search for materials and review activities necessary for class participation <i>reviewing literature, documentation, tools and materials as well as the specifics of the syllabus and the range of activities indicated in it as required for full participation in classes</i>	No
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>	No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>	No
a04	Preparation for classes	Consulting materials complementary to those indicated in the syllabus <i>agreeing on materials complementary to those indicated in the syllabus, supporting the implementation of tasks resulting from or necessary for class participation</i>	Yes
a05	Preparation for classes	Production/preparation of tools, materials or documentation necessary for class participation <i>developing, preparing and assessing the usefulness of tools and materials (e.g. aids, scenarios, research tools, equipment, etc.) to be employed in class or as an aid when preparing for classes</i>	No
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>	No
b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>	No
b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>	No
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No

c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class</i>	No
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)
4.	Level of qualifications/degree	long-cycle studies
5.	Degree profile	general academic
6.	Mode of study	part-time

7.	General information about the module	
Module name		Environmental protection law
Module code		pr_ochr_śr_07
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		<p>The objective of the module is for the student to acquire knowledge, skills, and competences in the area of legal regulations concerning the principles of environmental use. During the course, the student learns about the organizational structure of environmental protection law, its most important institutions and instruments, and the procedures that enable their practical application. The module course helps students understand the role that environmental protection issues play in the politics and economy of a modern state.</p> <p>As part of the module, the student becomes familiar with basic information regarding Polish environmental protection law, particularly in the following areas: sources of law, selected environmental proceedings, so-called "emission law," the use of economic instruments for environmental protection, nature conservation, and the management of geological environmental resources.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competence (scale 1-5)	
kpgios_p_01_1	Knows the competences and procedures of public authorities in the field of environmental protection.	K_W06	2	
kpgios_p_01_2	Has knowledge of the sources of environmental law.	K_W07	3	
kpgios_p_01_3	Has knowledge of the subject matter of environmental law, in particular as to the extent of the rights and duties of the subjects of the law.	K_W10	3	
kpgios_p_01_4	Is familiar with the basic regulations of environmental law, including emission law, investment environmental law, forms of nature conservation and concerning the rules for the use of geological environmental resources.	K_W11	4	
kpgios_p_01_5	Is able to find the relevant legal regulation on environmental law, interpret it and draw conclusions as to the course of action that is permissible or required.	K_U04	1	
kpgios_p_01_6	Is able to find and correctly apply solutions for specific environmental procedures.	K_U10	3	
kpgios_p_01_7	Is prepared to perform functions in the structure of the public administration responsible for environmental protection.	K_K03	4	

kpgios_p_01_8	Is ready to behave professionally and ethically in relation to the performance of professional tasks related to environmental protection.	K_K07	5
kpgios_p_01_9	Is ready to develop social projects within the field of environmental law, and to use his entrepreneurial thinking to apply regulations in this area of law in his role as an arbitrator, negotiator or advisor.	K_K04	5

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
c07	Demonstration methods	Screen presentation <i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points,</i>

		<i>charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching

7.	General information about the module	
Module name		EU funds and projects
Module code		K1_fun_i_pro_UE 04
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		<p>The goal of the module is to familiarise students with the legal conditions of the European Regional Development Fund, the European Social Fund Plus, the Cohesion Fund, the Fair Transition Fund, the European Maritime, Fisheries and Aquaculture Fund and the European Agricultural Fund for Rural Development.</p> <p>In view of the reform of the European Union's cohesion policy in the 2021-2027 programming period, it has become necessary to be familiar with the implementation of EU funds, the procedure for obtaining funds from these funds and the control of their use. The student's main attention is focused on the legal aspects of the issues indicated. The course also discusses the European Union's cohesion policy and the conditions for the implementation of EU funds. The course will also include a review of national and regional operational programmes.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
fun_pro_01	Knows and understands the structure and competences of the authorities responsible for obtaining EU funds, as well as the basic concepts related to cohesion policy.	K_W06 K_W08	1 2	
fun_pro_02	Knows and understands legal regulations, appropriate terminology, as well as legal acts at both EU and national levels concerning the principles of implementation and management of national and regional programs, as well as the rules for obtaining funds from EU sources.	K_W03 K_W07	3 3	
fun_pro_03	Is able to analyze the principles of obtaining funds from EU sources and to prepare appropriate solutions for a given factual situation, performing various roles within a team as well as acting as an expert.	K_U05 K_U12	3 1	
fun_pro_04	Knows and understands the constitutional principles related to the system of EU funds and projects at both national and international levels, as well as the rights and obligations of individual entities.	K_W05 K_W10	2 1	
fun_pro_05	Is prepared to critically assess their knowledge regarding the acquisition of EU funds, when preparing or evaluating a funding application, taking into account the public interest, and is also ready to consult expert knowledge in the course of	K_K02	1	

	their professional activity.	K_K08	2
fun_pro_06	Is able to resolve professional dilemmas related to obtaining funds in an ethical manner, using appropriate legal regulations, as well as methods and tools, and is prepared for lifelong learning.	K_U04 K_U13	2 4
fun_pro_07	Is prepared to participate professionally and ethically in the process of preparing, evaluating, and awarding funding from EU funds.	K_K07	2

7.	General information about the module	
Module name		European judicial proceedings
Module code		K7_eur_post_sąd 10
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		<p>The module is designed to provide students with knowledge, competences and skills concerning the enforcement of civil claims of a cross-border nature, in particular claims arising between counterparties coming from different Member States of the European Union or claims resulting from a contract that was performed in another Member State. In the field of civil procedure, students will gain skills concerning access to courts and court procedures functioning in a given Member State for entities coming from other European Union countries. Students will learn about the uniform regulations in force at EU level in the field of specific civil proceedings, which allow a claim to be asserted in another Member State on the basis of universal norms rather than the norms in force in the internal legal system of the country concerned. In the part related to international cooperation in criminal matters, the module is supposed to enable students to become familiar with the rules on the performance of procedural acts by courts of a Member State other than the forum state, i.e. the state in which criminal proceedings are conducted. At the end of the module, students should also have knowledge concerning the instruments of cooperation in criminal matters between the countries belonging to the European Union, in particular the European Arrest Warrant and the European Investigation Order.</p> <p>Students will be provided with competences enabling them to become familiar with the procedures initiated when a Polish authority is approached by an authority of another Member State with a request to act in a trial conducted by that authority, and initiated by a Polish authority making a similar request to an authority of another Member State. The module will also provide knowledge on EU offices facilitating cooperation between Member States' courts in civil and criminal matters and coordinating or conducting pre-trial proceedings in cross-border cases.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
eps_01	Has knowledge of issues related to civil court proceedings as well as selected matters concerning European Union law and international conventions.	K_W10	4	
eps_02	He knows the competence of the Court of Justice of the European Union to answer preliminary questions in criminal and civil cases pending before a national court.	K_W05	3	
eps_03	He is ready to critically estimate the level of his knowledge of the rules of cooperation in criminal and civil offenders between countries of the European Union, solving a complex legal problem in this area.	K_K08	5	

eps_04	Has the ability to use instruments of cooperation in criminal matters between European Union member states, such as the European Arrest Warrant and the European Investigation Order.	K_U08	5
eps_05	Freely uses the terminology appropriate for civil proceedings and procedural actions in criminal cases at the EU level.	K_W03	3
eps_06	Is able to interpret and critically assess legal regulations in the field of civil and criminal procedure law from the perspective of seeking solutions to specific cases.	K_U05	4

c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class</i>	No
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)
4.	Level of qualifications/degree	long-cycle studies
5.	Degree profile	general academic
6.	Mode of study	part-time

7.	General information about the module	
Module name		European Union law
Module code		pr_unii_eur_04
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		The aim of the module is for the student to master the subject of the law governing the most important international organizations operating on the European continent (i.e. the Council of Europe, the European Union, and the Organization for Security and Co-operation in Europe). In particular, the student is expected to acquire knowledge about the functioning mechanisms of European institutions, their law-making competences, and the instruments used to monitor compliance with the law. In addition to the necessary theoretical knowledge, the student gains the ability to distinguish the relationship between European law and Polish law, apply the principles of European law (including the principle of direct effect), and use the legal protection systems within the Council of Europe and the EU.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competence (scale 1-5)	
miedz_p_02_1	Has knowledge of the sources of European Union law.	K_W07	3	
miedz_p_02_2	Has knowledge of the institutions and legal constructs developed within European Union law.	K_W08	4	
miedz_p_02_3	Has knowledge of the European Union standards in the field of human rights protection.	K_W13	4	
miedz_p_02_4	Is able to locate and interpret the relevant legal regulation of Council of Europe law and European Union law using appropriate techniques and tools.	K_U04	3	
miedz_p_02_5	Is able to locate judgments of the European Court of Human Rights and the Court of Justice of the European Union, as well as to critically analyze them.	K_U05	2	
miedz_p_02_6	Is able to prepare a draft individual application to the European Court of Human Rights.	K_U10	3	
miedz_p_02_7	Is ready to express opinions and views on the functioning and further development of European institutions.	K_K01	2	

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
d03	Programmed learning methods	Working with another teaching tool <i>e.g. using websites in any way or according to the rules set by the teacher; or making use of other subject-specific tools</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching

7.	General information about the module	
Module name		Evolution of state systems
Module code		Ew_ustr_pań_02
Number of the ECTS credits		6
Language of instruction		Polish
Purpose and description of the content of education		The goal of the module is to introduce students to the evolution of the basic concepts and institutions of public law, with particular emphasis on constitutional law, and the paths of their development. Students are introduced to the historical evolution of the state systems of the major countries of the world, analysing the reasons for the differences in political systems. Particular focus is placed on understanding the changes in law-making methods and state governance, including the evolution of the constitutional institutions that form the foundation of European legal culture. The course also covers issues of constitutionalism and codification, showing the historical background of the emergence of the constitution and the institution of judicial law. The aim of the module is to present the evolution of the political system of states in a comparative context. The module covers the history of the political system in Poland, as well as the main elements of the political systems of: England, Germany, France, the United States of America and Russia. The module introduces detailed problems of the social and political system.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competence (scale 1-5)	
ew_ustr_pań_01	Knows and understands the periodization, developmental trends, and evolution of the political system of Poland, as well as of other selected countries.	K_W02	4	
ew_ustr_pań_02	Identifies and knows the characteristics, as well as the terminology and institutions of the various periods of the political system.	K_W03	2	
ew_ustr_pań_03	Knows and understands the ideological and legal foundations of the patrimonial state; the public-law state; theories of representation; the theory of the absolute state; the liberal state; the rule-of-law state; the principles of the separation of powers; as well as the sources of the political system of Poland and selected foreign countries, primarily constitutional acts; the typology of constitutions; and major quasi-constitutional laws.	K_W05	4	
ew_ustr_pań_04	Recognizes the social and political phenomenon affecting the evolution of state systems and the more important elements of the political system (e.g., the principles of constitutional and political responsibility of ministers).	K_U02	4	
ew_ustr_pań_05	Is able to recognize and properly interpret the origin and evolution of various constitutional models, as well as the difference between constitutional law provisions and the constitutional principles implemented in practice.	K_U08	2	

ew_ustr_pai_06	Is able to apply specific constitutional concepts in assessing the history of Europe in the context of their relation to law, within the process of interpreting legal provisions.	K_U09	3
ew_ustr_pai_07	Is aware of contemporary constitutional trends and principles, as well as their origins, and is prepared to express views on social and ideological matters.	K_K01	3
ew_ustr_pai_08	Is prepared to analyze specific social processes and constitutional institutions in terms of their ideological origins and the relationship between types of state systems and the social and economic order.	K_K02	3

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>

a01	Lecture methods / expository methods	Formal lecture/ course-related lecture	

		<i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
a04	Lecture methods / expository methods	Lecture-speech <i>a lecture variant; an oral presentation of lecture content which has been prepared in writing; a lecture-speech can be delivered by the person teaching the course or an invited guest</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>

7.	General information about the module	
Module name		Foreign language course 1
Module code		LJO-NS-2025-01
Number of the ECTS credits		3
Language of instruction		
Purpose and description of the content of education		The module aims to develop communicative language competences and to stimulate the acquisition of skills in oral and written language reception and production as well as in language interaction and mediation, taking into account different varieties and registers of the foreign language and the necessary language strategies. The module develops the ability to learn, to independently search for and select information and sources of knowledge, and to work in a team. The main emphasis is placed on strengthening the skills of effective communication with others and the fluent use of foreign language in social, educational or professional contacts in accordance with the criteria laid out in the Common European Framework of Reference for Languages (CEFR).
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
LJO1_1	Can, following the teacher's instructions, use his/her general knowledge in order to develop and practice the listening, reading, writing and speaking skills in a foreign language, can formulate clearly and correctly, moderately complex oral and written texts on various topics, effectively and properly using the relevant vocabulary and rules for the organization of statements, in accordance in accordance with the criteria laid out in the Common European Framework of Reference for Languages (CEFR).	KJ.2023_U	2	
LJO1_2	Can search, collect and make use of general information contained in foreign texts of various levels of difficulty, can present their opinions using correct language constructions.	KJ.2023_U	2	
LJO1_3	Can, following general instructions, properly select sources and general information needed to learn a foreign language.	KJ.2023_U	2	

9.	Methods of conducting classes		
Code	Category	Name (description)	
a03	Lecture methods / expository methods	Description <i>a description of objects, phenomena, processes or people; it involves specifying the structure and characteristic features of the object, phenomenon, or process being described; it is usually accompanied by a demonstration of the described object</i>	

		<i>or by its models, drawings, tables, charts, etc.; a description may take the form of an explanation, classification, justification or comparison</i>
a05	Lecture methods / expository methods	Explanation/clarification <i>explication involving the derivation of a predetermined theorem from other, already known ones, in the number of steps specified by the person teaching the course</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
c02	Demonstration methods	Video show <i>reproducing a film or video material in its entirety or in fragments in order to illustrate the content taught in class, to submit it to analysis and evaluation or to use it as an exercise in image perception; a film/video can be a work of art, an illustration (also technical illustration) of a content/phenomenon/object, a private record of an action, a media image, etc.</i>
c03	Demonstration methods	Audio playback / audio drama <i>preparation and reproduction of sound material (audio recording) in its entirety or in fragments in order to illustrate the content taught in class, to submit it to analysis and evaluation or to use it as a method of sound perception, including the appreciation of a musical piece, an artistic audio drama, an oral presentation of an artistic or scientific text as well as a media text; analysis of the sound material recorded on a carrier with a view to studying a sound-related phenomenon</i>
c06	Demonstration methods	Demonstration-imitation <i>a presentation of a model way of performing specific activities accompanied by a commentary; it aims at triggering imitation activities in an individual or in a group of participants observing the activities of the person teaching the course until the right habit is formed through regular exercise; the demonstration-imitation method is combined with a physical practice of activities/behaviours</i>
c07	Demonstration methods	Screen presentation <i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points, charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
d03	Programmed learning methods	Working with another teaching tool <i>e.g. using websites in any way or according to the rules set by the teacher; or making use of other subject-specific tools</i>
d04	Programmed learning methods	Reconstruction / reproduction <i>proceeding according to the indicated/displayed pattern/model; e.g., the reconstruction of a structure, model, image, etc.</i>
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>
f01	Methods of self-learning	Self-education <i>a method which involves independent acquisition of knowledge, skills and social competences, extending their scope and quality; complementary to the learning process taking place in class; taking on the task of developing and adjusting qualifications on one's own; self-study</i>
f02	Methods of self-learning	Individual work with a text

		searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue
--	--	--

Number of the ECTS credits		3
Language of instruction		
Purpose and description of the content of education		The module aims to develop communicative language competences and to stimulate the acquisition of skills in oral and written language reception and production as well as in language interaction and mediation, taking into account different varieties and registers of the foreign language and the necessary language strategies. The module develops the ability to learn, to independently search for and select information and sources of knowledge, and to work in a team. The main emphasis is placed on strengthening the skills of effective communication with others and the fluent use of foreign language in social, educational or professional contacts in accordance with the criteria laid out in the Common European Framework of Reference for Languages (CEFR).
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
LJO3_1	Can independently use the acquired knowledge in order to develop and practice listening comprehension, reading, writing and speaking skills in a foreign language at an appropriate level.	KJ.2023_U	3	
LJO3_2	Can effectively search, select, synthesize and use information contained in foreign texts of varying levels of difficulty on topics specified in the syllabus of the module.	KJ.2023_U	3	
LJO3_3	Can communicate in a foreign language in speech and writing, producing texts on the topics specified in the module syllabus using various communication channels and techniques, can participate in a debate, present his/her own and other people's positions and discuss them in a foreign language.	KJ.2023_U	3	

9.	Methods of conducting classes		
Code	Category	Name (description)	
a03	Lecture methods / expository methods	Description <i>a description of objects, phenomena, processes or people; it involves specifying the structure and characteristic features of the object, phenomenon, or process being described; it is usually accompanied by a demonstration of the described object or by its models, drawings, tables, charts, etc.; a description may take the form of an explanation, classification, justification or comparison</i>	

a05	Lecture methods / expository methods	Explanation/clarification <i>explication involving the derivation of a predetermined theorem from other, already known ones, in the number of steps specified by the person teaching the course</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
c02	Demonstration methods	Video show <i>reproducing a film or video material in its entirety or in fragments in order to illustrate the content taught in class, to submit it to analysis and evaluation or to use it as an exercise in image perception; a film/video can be a work of art, an illustration (also technical illustration) of a content/phenomenon/object, a private record of an action, a media image, etc.</i>
c03	Demonstration methods	Audio playback / audio drama <i>preparation and reproduction of sound material (audio recording) in its entirety or in fragments in order to illustrate the content taught in class, to submit it to analysis and evaluation or to use it as a method of sound perception, including the appreciation of a musical piece, an artistic audio drama, an oral presentation of an artistic or scientific text as well as a media text; analysis of the sound material recorded on a carrier with a view to studying a sound-related phenomenon</i>
c06	Demonstration methods	Demonstration-imitation <i>a presentation of a model way of performing specific activities accompanied by a commentary; it aims at triggering imitation activities in an individual or in a group of participants observing the activities of the person teaching the course until the right habit is formed through regular exercise; the demonstration-imitation method is combined with a physical practice of activities/behaviours</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
d03	Programmed learning methods	Working with another teaching tool <i>e.g. using websites in any way or according to the rules set by the teacher; or making use of other subject-specific tools</i>
d04	Programmed learning methods	Reconstruction / reproduction <i>proceeding according to the indicated/displayed pattern/model; e.g., the reconstruction of a structure, model, image, etc.</i>
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>
f01	Methods of self-learning	Self-education <i>a method which involves independent acquisition of knowledge, skills and social competences, extending their scope and quality; complementary to the learning process taking place in class; taking on the task of developing and adjusting qualifications on one's own; self-study</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching

7.	General information about the module	
Module name		History of law
Module code		his_pr_02
Number of the ECTS credits		6
Language of instruction		Polish
Purpose and description of the content of education		<p>The aim of the module is to familiarise the student with the history, development and evolution of judicial law (civil and criminal, in the 20th century also labour law) and legal thought and the organisation of the judiciary from the beginning of the Middle Ages in principle until the end of the 20th century (latest date: 1991 USSR). The territorial scope is Europe and fragmentarily the USA. A special focus and detailing of the lecture takes place with regard to more recent times: from the Age of Enlightenment (18th century) and especially for the 20th century. The history of law in the USSR (1917-1991) and People's Poland (1944-1989) is extensively taught.</p> <p>The student acquires knowledge of the origins, nature and evolution of judicial law, while understanding the mechanisms of formation and consequences of key legal concepts and institutions. Student is able to identify and accurately interpret connections between legal phenomena and widely understood cultural and social conditions, analysing them in historical context. Within the framework of the course, the student develops the ability to use historical-legal sources, carries out their critical analysis and applies historical-legal methodology. Furthermore, is able to compare, interpret and reconstruct legal institutions, as well as explain the causes and effects of specific legal regulations, using historical examples and court decision as source material.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
hispr_p_01_1	Knows and understands the history and evolution of judicial law and the administration of justice in Europe throughout the centuries.	K_W02	5	
hispr_p_01_2	Knows and understands legal thought and its influence on the development of individual legal institutions.	K_W03	2	
hispr_p_01_3	Knows the most important sources of law in Poland and various European countries up to the end of the 20th century.	K_W07	3	
hispr_p_01_4	Knows and understands the legal principles of individual branches of law in their historical development.	K_W08	4	
hispr_p_01_5	Knows and understands the development of legal institutions and the administration of justice in the historical development in European legal culture (fragmentary US), including the rights and obligations of legal subjects.	K_W10	3	

hispr_p_01_6	Recognizes the mechanisms and effects of the functioning of law, as well as the evaluation, interpretation, and resolution of specific factual situations in a historical context.	K_U03	3
hispr_p_01_7	Assesses the historical development of Europe in the context of its relationship with the creation and application of law.	K_U02	4
hispr_p_01_8	Is ready to make the impact of social and political phenomena in the context of historical development on the content of the law and the functioning of the judiciary.	K_K02	5

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
c07	Demonstration methods	Screen presentation <i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points, charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>

f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>
-----	--------------------------	---

7.	General information about the module	
Module name		Human rights and their protection systems
Module code		K1_pr_człow_sys 04
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		<p>The aim of the module is to familiarize the participant with the possibilities of protecting human rights, which are provided by global and European mechanisms. It is assumed that after the course, the student should be able to move around the universal and European space in the field of human rights and independently cope with the pursuit of rights before international institutions (at least at the introductory stage). The subject will develop issues signaled only as part of the course on public international law. Particular emphasis will be placed on universal and European mechanisms, i.e. the most important ones for a Polish lawyer.</p> <p>During the lecture, the following issues are discussed:</p> <ol style="list-style-type: none"> 1. The concept of human rights 2. Sources of protection/sources of law 3. National and international protection 4. The status of a citizen and a foreigner 5. Human rights institutions 6. Human rights control mechanisms 7. Complaint to the ECtHR 8. Notification to human rights treaty bodies 9. Special Procedures of the Human Rights Council and the role of NGOs 10. Human rights in the EU 11. Special protection of sensitive groups (selection according to students' suggestions)

7.	General information about the module	
Module name		Humanities module (optional)
Module code		MH_01
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		The humanities module allows student to become accustomed to selected areas of subject specificity in the humanities. The student has a chance to compare various methodological and interpretative approaches, gains knowledge about the benefits of adopting a humanistic perspective on reality. The student learns to implement the recognised paradigms of humanistic thinking in scientific activity, creatively solving the problems raised in class. On specific cases, he/she develops the ability to integrate approaches characteristic of the humanities with viewpoints belonging to the fields of science and scientific disciplines relevant to the studied major. In the course student encounters, identifies paths of participation in current and future cultural formations, recognizing in the activities presented and experienced paths of individual participation in the life of human communities proper to oneself.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
mh_01	The student knows selected issues related to the subject-related specificity of the humanities, understands their nature, place and importance in the system of sciences, as well as their connections with fields of science and scientific disciplines specific to the studied programme, allowing for the integration of perspectives appropriate for different scientific disciplines.	K_W14	4	
mh_02	he student is able to select, interpret and evaluate knowledge from selected disciplines in the field of humanities and integrate and apply it in scientific activity and professional practice in a manner that allows for original and creative solutions to problems that they experience as participants in cultural life.	K_U03	2	
mh_03	The student is able to creatively undertake, analyse and become involved in current sociocultural discourses, using knowledge of the studied problems of contemporary humanities and acquired communication skills as well as subjectrelated argumentation that considers various scientific approaches and types of scientific reflection.	K_K01 K_K02	5 4	
mh_04	The student, who is a participant in cultural life in its various manifestations, shows the need for continuous learning and improvement of those dispositions that allow to appreciate humanistic reflection and integrate it with issues and experiences resulting from choosing one's own path of scientific and professional activities and related to individual	K_U02 K_U13	4 4	

	cultural activity.		
mh_05	Is familiar with the various types of challenges arising in the field of humanities affecting the various fields of law, as well as solving the dilemmas of modern civilization.	K_W11	3

Language of instruction		
Purpose and description of the content of education		The aim of the module is to familiarise students with the organisational and substantive basics of legal work in various forms (places of employment). On the other hand, the aim of the internship is to make the theoretical knowledge that students acquire in the course of individual modules more realistic. This module is therefore designed to enable students to gain practical knowledge of selected types of legal relationships characteristic of the place where the internship is carried out, and to understand the principles that govern them. During the course, students learn about the specifics of the functioning of the Polish legal system in practice, learning how to solve real legal problems independently. The module also aims to familiarise students with the standards of legal work, the social and communication requirements of individual professions, as well as their professional ethics. After completing the module, students will be able to apply their theoretical knowledge of the Polish legal system in practice to solve specific problems independently by drafting basic documents, pleadings, and written analyses and interpretations. In addition, they will have the ability to communicate effectively in the workplace and work in a team.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
wpia_p_prakt_1	Acquires a deepened awareness of the ethics of the legal profession. Performs the tasks entrusted to him/her with particular regard to the obligation to observe the principles of professional secrets, protection of the information obtained and concern for the harmonious flow of information.	K_W06 K_W15	5 5	
wpia_p_prakt_2	Has an in-depth knowledge of the practical principles and flow of reasoning and legal logic; learns how different types of legal interpretation, legal inference and rules of subsumption work in practice.	K_W04	4	
wpia_p_prakt_3	Is able to find the relevant legal regulation, interpret the regulations and draw conclusions as to the acceptable or required conduct.	K_U04	3	
wpia_p_prakt_4	Is able to find factually relevant individual decisions (e.g., rulings, decisions), evaluate their relevance to the resolution of a case and, on this basis, predict possible resolutions.	K_U05	2	
wpia_p_prakt_5	Acquires the ability to estimate events in the context of their relation to the law - can interpret them, apply the principles of logic and one's own life experience. Can predict possible positions on a given issue and also propose its own.	K_U03	4	

wpia_p_prakt_6	Acquires skills of relevant communication. Is able to communicate with the public, with lawyers, with non-specialists in the field, to provide and defend own views. Can prepare one's position verbally and in the written form.	K_K01	3
wpia_p_prakt_7	Has an awareness and learns in practice socially responsible design and performance of professional tasks - team and individual.	K_K06	5
wpia_p_prakt_8	Acquires an awareness of the importance of behaving in a professional and ethical manner.	K_K07	5

7.	General information about the module	
Module name		Introduction to legal studies
Module code		wst_d_pr_01
Number of the ECTS credits		7
Language of instruction		Polish
Purpose and description of the content of education		The aim of the module is to familiarize the student with basic concepts in the field of legal sciences, the knowledge of which is essential for further continuation of studies, and in particular for studying dogmatic subjects. The student is introduced both to the origins of these concepts and to the current state of regulations in this area. The lecture covers both theoretical issues and their practical aspects. As part of the course, students are also introduced to basic issues concerning the interpretation and application of law. A separate range of topics presented during the lecture includes fundamental problems of contemporary philosophy of law (including various concepts of law, the issue of the ambiguity of the term "law," and controversies related to the problem of the binding force of a provision). As a result of the course, the student should acquire the ability to understand and use basic legal concepts, which will enable them to analyze and understand legal phenomena as well as to recognize and solve basic legal problems in the further course of their studies.

7.	General information about the module	
Module name		Juvenile proceedings
Module code		K6_post_w_sp_niel 10
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		<p>The content of the module is to present legal acts regulating proceedings in juvenile cases, principles of responsibility for acts covered by the Act on the Support and Resocialization of Minors, both in terms of the subject and the subject, as well as the conceptual framework relevant to this area. Students will also learn about the system of educational, corrective and therapeutic measures for juvenile delinquency, in comparison with penal measures for criminal responsibility. They will also learn about the basic factors contributing to the commission of criminal acts by juveniles from the perspective of criminology, as well as the differences characteristic of juvenile delinquency among girls. The basic principles regarding enforcement proceedings in juvenile cases are also considered. The second part of the lecture is a presentation of procedural issues concerning proceedings in juvenile cases. During the classes, three basic models of proceedings in juvenile cases will be presented first, i.e. the care model, the justice model and the model with elements of restorative justice. the basic features of these models will then be characterized in the context of the legal systems of the countries that adopted them, i.e. in the context of the legal solutions in force in the USA and in England and Wales. Polish proceedings in juvenile cases will be characterized from the perspective of these three model solutions. The analysis will also cover procedural guarantees available to minors, and their characterization will take place in the context of international and constitutional standards. These standards will also be discussed in the context of the provisions regulating temporary preventive measures applied to minors. Students will also be presented with the issues of statics and dynamics of proceedings in juvenile cases. Within this framework, evidentiary issues and participants in proceedings in cases of criminal acts and demoralization of minors will be analyzed. Considerations on the kinetics of the proceedings will cover court proceedings, the powers of the Police in the field of collecting evidence for the needs of the court, and the method of appealing against a judgment will also be described. The subject of analyses will also be the issue of the admissibility of challenging a final judgment by extraordinary means of appeal provided for in civil procedure, i.e. a cassation appeal, a motion to reopen the proceedings, a complaint for a declaration of illegality and an extraordinary complaint.</p>

7.	General information about the module	
Module name		Labor law - part II
Module code		pr_prac_06
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		<p>The aim of the module is to familiarize the student with the fundamental principles and institutions of labor law and social security law. The student should learn the rules for establishing and terminating employment relationships and be able to identify the basic duties of employees and employers, particularly those related to working time, remuneration, and employee liability.</p> <p>During the course, students also become acquainted with the basic institutions of collective labor law and structures of the social insurance system. They develop the ability to interpret labor law provisions and apply them in practice. The course is tailored to the needs of law students.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
pracy_p_2_01	Is familiar with the institutions and legal constructs found in labour and social security law.	K_W08	3	
pracy_p_2_02	Has knowledge of the universal and autonomous sources of labour law, the principles of their creation and hierarchy.	K_W07	4	
pracy_p_2_03	Knows and understands the basic rights and responsibilities of employees and employers.	K_W10	3	
pracy_p_2_04	Has knowledge of the basic acts of European labour law.	K_W13	3	
pracy_p_2_05	Is able to find a solution for a given factual situation based on labour legislation and case law.	K_U05	4	
pracy_p_2_06	Is able to use the literature on labour law, the legal database, case law and decisions.	K_U09	3	
pracy_p_2_07	Is ready to critically estimate own knowledge in the field of labour and social security law, to expand and complete it by consulting experts when solving labour law problems.	K_K08	3	

9.	Methods of conducting classes		
Code	Category	Name (description)	
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture	

		<i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching					
Code	Name	Number of hours	Assessment of the learning outcomes of the module	Learning outcomes of the module	Methods of conducting classes

11. The student's work, apart from participation in classes, includes in particular:			
Code	Category	Name (description)	Is it part of the BUNA?
a01	Preparation for classes	Search for materials and review activities necessary for class participation <i>reviewing literature, documentation, tools and materials as well as the specifics of the syllabus and the range of activities indicated in it as required for full participation in classes</i>	No
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>	No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>	No
a04	Preparation for classes	Consulting materials complementary to those indicated in the syllabus <i>agreeing on materials complementary to those indicated in the syllabus, supporting the implementation of tasks resulting from or necessary for class participation</i>	Yes
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>	No
b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>	No
b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>	No
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing</i>	No

		<i>knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class</i>	
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration

7.	General information about the module	
Module name		Latin terminology with elements of rhetoric
Module code		term_lac_01
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		The aim of the module is to familiarize the student with Latin maxims (sentences), Latin legal phrases and expressions used in legal practice and the study of law. Within the module, students learn both the dogmatic and the genetic (historical) context. Particular attention is paid to the use of Latin terminology in its practical and scholarly application within the framework of contemporary legal discourse. The course also covers the use of Latin terminology in legal argumentation and rhetoric. The module also aims to acquaint the student with rhetorical principles and techniques, enhance these skills, and prepare a speech using appropriate terminology.

7.	General information about the module		
Module name		Law enforcement agencies and legal professions	
Module code		K1_or_ochr_pr_zaw 04	
Number of the ECTS credits		4	
Language of instruction		Polish	
Purpose and description of the content of education		<p>The aim of the module is to familiarize the student with all the most important issues covered by the scope of the subject, in particular: terminological issues related to the essence of the activity consisting in legal protection and its individual forms. During the course, the student should acquire knowledge of the principles of organization, functioning and competences of individual bodies appointed to administer justice, dealing with legality control and providing legal advice. As part of the course, the student should learn, in particular, the basic principles of the system, competences and the method of selecting the composition of the judicial authorities. As part of familiarizing the student with the bodies resolving civil and criminal conflicts, the student will be presented with the basic principles of the procedure for making and challenging decisions on civil and criminal liability. The teaching cycle of the subject also includes equipping students with knowledge of the type, organization and scope of powers of bodies specifically appointed exclusively for legality control or performing the function of legality control as one of many within the control functions. The classes are also to familiarize students with the activities of bodies dealing with the provision of legal assistance, cooperation in the protection of civil rights and freedoms, and the shaping and application of law. In addition, the course aims to familiarize students with the knowledge of the ethics of the legal profession and the basic values that must be taken into account in the professional work of legal professionals. In particular, it is important to show students the "common parts" and basic differences between individual legal professions and the values that form the basis of their practice. The classes are to give students an opportunity to answer the question of what legal ethics is, what is its place in the work of representatives of legal professions and what areas of professional ethics are particularly important today. The subject is to explain the relationship between the basic categories of professional ethics: professional duties, professional roles or the moral responsibility of professionals. As a consequence, the student should master the material that is a specific basis and starting point in further education during studies. On the basis of the problems learned, he should obtain the knowledge needed to consciously choose the future career path as well as knowledge about the ethical requirements that are imposed on people intending to practice legal professions in the future.</p>

7.	General information about the module	
Module name		Local government law
Module code		pr_sam_teryt_05
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		<p>The aim of the module is to acquaint students with current legal regulations concerning the organization and principles of functioning of local government in Poland. Students are expected to gain knowledge of fundamental issues related to the essence and concept of local self-government, the organization of communes, counties, and voivodeships, forms of cooperation between local government units, the tasks of local government, and the principles of supervision over local administration.</p> <p>The course covers current legal issues, taking into account the historical context. Additionally, attention is paid to the practical aspects of local government administration, so students should acquire the ability to apply theoretical knowledge (e.g., understanding the rules for adopting resolutions, drafting legal acts or documents in administrative or administrative court proceedings involving local government units).</p>

11. The student's work, apart from participation in classes, includes in particular:				
Code	Category	Name (description)		Is it part of the BUNA?
a01	Preparation for classes	Search for materials and review activities necessary for class participation <i>reviewing literature, documentation, tools and materials as well as the specifics of the syllabus and the range of activities indicated in it as required for full participation in classes</i>		No
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>		No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>		No
a04	Preparation for classes	Consulting materials complementary to those indicated in the syllabus <i>agreeing on materials complementary to those indicated in the syllabus, supporting the implementation of tasks resulting from or necessary for class participation</i>		Yes
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>		No
b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>		No
b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>		No
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>		No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as</i>		No

		<i>well as from the notes or other materials/artifacts made in class</i>	
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)

5.	Degree profile	general academic
6.	Mode of study	part-time
7.	General information about the module	
Module name		Logic for lawyers
Module code		log_01
Number of the ECTS credits		7
Language of instruction		Polish
Purpose and description of the content of education		<p>The purpose of the curriculum objectives in logic for lawyers are exercises oriented to the verification of reasoning.</p> <p>Students complete and expand their knowledge in the following areas:</p> <ol style="list-style-type: none"> 1. Issues including introduction to semiotics and semiology. Sign, language and sub-languages; the main functions of language (descriptive, expressive, performative). Syntactic categories. 2. Names: construction of a name (functors, arguments), connotation, denotation and supposition of a name. Special linguistic phenomena (oxymorons, pleonasm, etc.). 3. Relationships between ranges of names. Logical division. 4. Definitions and defining. Ambiguity of names, equivocation. 5. Relations. 6. Judgments. Sentences: structure, truthfulness, modality, question sentences. 7. Complex sentences, truthfulness functors. Amphibologies. 8. Tautologies of the calculus of sentences. 9. Categorical sentences, transformation of sentences (conversion, obversion, contrapositions, inversions). 10. The logical square, arguments of legal logic (a fortiori, a contrario, reductio ad absurdum). 11. Categorical syllogism (legal syllogism), enthemata and epicheremata. 12. Reasoning: deductive, reductive, progressive and regressive. 13. Explanation and verification. On the reliability of reasoning and the unreliability of empirical claims. Judicial proof. 14. Inductive reasoning. Mill's canons. 15. Probabilities (stochastic, psychological). <p>In particular, the effect of education is the mastery of the principles of correct reasoning characteristic of legal language and the ability to apply knowledge of logic in the future work of a lawyer.</p>

8. Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)
log_01	Has the ability to conduct reasoning according to the rules of reliability; is able to interpret and evaluate events taking into account the principles of legal logic.	K_U03	4
log_02	Has the ability to find defects in others' reasoning, presenting the relevant position.	K_U11	3
log_03	Is prepared to develop the habit of intersubjective communicability, including engaging in discussions in accordance with the rules of logic.	K_K01	2
log_04	He knows and understands in a deeper degree the principles of formation of elementary laws of science - deductively and reductively derived, the rules of judicial proof, as well as the principles of reasoning and legal logic.	K_W04	4
log_05	Is able to carry out the interpretation of legal texts taking into account the principle of rationality of the legislator and the rules of logical interpretation.	K_U03	1
log_06	Can use the knowledge of logic in the preparation of normative acts.	K_U10	1

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>

7.	General information about the module	
Module name		Misdemeanor law
Module code		K1_pr_wykr 04
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		<p>The aim of the module is to provide knowledge about legal regulations concerning misdemeanors, the principles of liability for such offenses, and the issues of punishment. The student is expected to acquire the ability to apply theoretical knowledge and to subsume specific factual situations under the relevant legal norms. Upon completing the course, the student should understand the relationships and interdependencies between "classical" criminal law and violation law.</p> <p>Another goal of the course is to familiarize students with the full scope of regulations governing the conduct of state authorities and other participants aimed at detecting and establishing a violation and identifying its perpetrator, as well as imposing a penalty or applying other measures—or, in the absence of a violation, the perpetrator's guilt, or in the presence of exonerating circumstances, issuing an acquittal. After completing the course, students should have a general understanding of the procedures for punishing violations, including special proceedings such as summary proceedings, expedited proceedings, and penalty notice proceedings. Students should also be familiar with regulations concerning the admissibility, conduct, and use of evidence. The course is intended to provide students with knowledge that allows them to determine the relationship between criminal proceedings and proceedings for violation liability, especially in cases of the so-called real concurrence of a crime and a violation.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
pw_wykr_01	Knows and understands the procedural models in cases concerning misdemeanors, as well as the authorities responsible for conducting such proceedings.	K_W06	1	
		K_W08	2	
pw_wykr_02	Defines the concept of a misdemeanor and other fundamental terms of misdemeanor law, and also knows the sources of violential law.	K_W03	3	
		K_W07	3	
pw_wykr_03	Is able to identify the statutory elements of a violation based on a given factual situation using the relevant legal regulations and to resolve related issues in an ethical manner.	K_U04	2	
		K_U13	4	

pw_wykr_04	Can see a differences between a violation and a crime and is able to critically analyze the factual situation and legal regulations in the field of violation law.	K_U05 K_U12	3 1
pw_wykr_05	Knows and understands the principles of liability for violation, the catalogue of penalties and punitive measures provided for such offenses, the rules for their adjudication, as well as the foundations and organization of the penalty enforcement system.	K_W05 K_W10	2 1
pw_wykr_06	Is ready to assess the arguments supporting proposed decisions, based on the case law and legal doctrine of violation law, while evaluating the interests of the participants in the proceedings and consulting expert opinions when necessary.	K_K02 K_K08	1 2
pw_wykr_07	Is ready to solve legal problems related to violation law in an ethical and professional manner.	K_K07	2

7.	General information about the module	
Module name		Module in the "Digital World" area
Module code		MO-2023-NS-CS
Number of the ECTS credits		3
Language of instruction		
Purpose and description of the content of education		<p>Apart from the real world, the digital world is of course another area constantly present in modern people's lives. The two human environments – the natural and the cultural one – have been joined by a third one, i.e. the digital environment. Modern digital technologies create new opportunities, but their constant development may, in addition to new opportunities, also create new threats. The modules proposed within the "Digital World" area provide an opportunity to learn about the crucial, current technological and social aspects of the digital world and to build competences for conscious, creative and safe functioning in this/her world.</p> <p>The modules of the Digital World area are divided into two sub-areas. Crucial for the first one, dubbed "Digital technologies", are the issues pertaining to technologies; this/her sub-area will allow students to expand their digital competences in the field of programming as well as data processing and analysis. Essential for the second sub-area, dubbed "Digital society", is a reflection on the impact of the development of digital technologies, including artificial intelligence, on the way we function as individuals and as entire societies. The purpose of the module content in this/her sub-area is to develop students' skills of navigating the digital world in creatively and safely, while maintaining personal autonomy and self-awareness.</p>

7.	General information about the module	
Module name		Non-contentious civil proceedings
Module code		K5_post_niepr_cyw 09
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		<p>The "Non-litigious Proceedings" module aims to familiarize students with the theoretical foundations and principles of non-litigious proceedings as one of the procedural modes in civil law. The module presents the most significant institutions and procedures related to non-litigious proceedings, with particular emphasis on key regulations included in the Code of Civil Procedure.</p> <p>Students will analyze, among other things, the principles of initiating, conducting, and resolving non-litigious cases, as well as the differences between litigious and non-litigious proceedings. The aim of the course is to deepen students' understanding of the importance of non-litigious proceedings in the civil law system, with particular focus on the role of the court and participants in these cases.</p> <p>The module includes an analysis of provisions governing non-litigious proceedings, including procedures related to inheritance matters, personal, property, and deposit law cases. Classes will also focus on presenting doctrinal views, interpretations of legal provisions, and court rulings, enabling students to understand the practical application of the law in non-litigious proceedings.</p>

7.	General information about the module		
Module name		Personal data protection	
Module code		K2_och_dan_osob 08	
Number of the ECTS credits		4	
Language of instruction		Polish	
Purpose and description of the content of education		<p>The module Personal Data Protection aims to familiarise students with the goals, principles and protection mechanisms used in the legal regulation of personal data protection. Personal data protection is a field of knowledge on the borderline of information, administrative, economic and legal sciences. As a subject of academic classes, Personal Data Protection focuses on the presentation of the basic protective regulations in this field. However, the knowledge and skills acquired should enable the student to independently analyse sectoral regulations in particular areas of social life of special interest. Within the realization of the module, the student is able to become familiar with the following key problem issues: protection of individual rights and freedoms, including protection of individual privacy, as a task of personal data protection, development of the idea of personal data protection, European and constitutional standards of personal data protection, subject and object scope of personal data protection, principles of personal data processing, duties of personal data administrators and personal data processors, rights of persons whose data are processed, control mechanisms, issue of penalties and liability.</p> <p>The aim of the course is above all to familiarise student with the legal solutions regulating the protection of personal data and to provide student with the practical skills of performing duties in the field of personal data protection. Graduates of the Faculty of Law, thanks to the realization of the module Personal data protection, will be prepared to perform various social functions on the market (lawyer, clerk, entrepreneur, consumer, etc.) to the extent in which they will perform duties, or use rights, related to the processing of personal information. Indeed, the module is intended to provide students with practical skills in the implementation of the requirements of conducting activities using personal information and in the exercise of rights, insofar as the processing of personal information is involved.</p> <p>Looking from the perspective of the teaching system, the subject is furthermore supposed to provide a basis for writing a diploma (master's) thesis in the field of personal data protection, if the student is interested in such an issue. If the student decides to prepare a thesis (master's thesis) dealing with the issue of personal data protection incidentally, the module will help to prepare a chapter dedicated to the issue.</p>

7.	General information about the module		
Module name		Political and legal doctrines	
Module code		Dok_pol_i_pr_02	
Number of the ECTS credits		6	
Language of instruction		Polish	
Purpose and description of the content of education		<p>The goal of the module is to provide students with knowledge, skills and competences in understanding the origins, significance, and impact of the main trends of political and legal thought in the Western cultural circle, in particular the most significant political and legal doctrines and their impact on the theory and practice of the modern state and law. The module discusses all basic doctrines of political, social, economic and legal character presenting visions of the functioning of the state and law starting from the ancient times and ending with the present day. The module allows the student to become acquainted with the output of outstanding thinkers of all periods (e.g. Plato, Aristotle, Machiavelli or Montesquieu), as well as to obtain comprehensive information on the most important political positions (e.g. conservatism, liberalism, socialism) and legal schools (e.g. the school of natural law, the historical school of jurisprudence, legal positivism).</p> <p>The module introduces the basic information on political and legal doctrines, in particular:</p> <ul style="list-style-type: none"> - ancient political and legal doctrines - the doctrines of the Middle Ages and the Renaissance - the rise of the Age of Enlightenment in the history of political and legal thought - the rise of modern trends in political thought - contemporary political, social and economic thought - disputes about the essence of law throughout history <p>Students will not only obtain a picture of the political and legal thought of a given era, but will also be able to follow the evolution of individual concepts and ideologies throughout history.</p>	
List of modules that must be completed before starting this module (if necessary)		not applicable	

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
dok_pol_i_pr_01	Knows and understands the basic concepts in the field of political and legal doctrines.	K_W02	4	

dok_pol_i_pr_02	Identifies and knows the main ideological trends of contemporary political and legal doctrines.	K_W03	2
dok_pol_i_pr_03	Knows and understands doctrinal views concerning the state, society, and law, as well as their mutual relations.	K_W05	4
dok_pol_i_pr_04	Identifies social and political phenomena that influence the content of specific political and legal views.	K_U02	4
dok_pol_i_pr_05	Is able to recognize and properly interpret the origin and significance of specific institutions within the field of political and legal doctrines.	K_U08	2
dok_pol_i_pr_06	Is able to use specific legal concepts in the process of interpreting legal provisions.	K_U09	3
dok_pol_i_pr_07	Is aware of contemporary doctrinal and legal-philosophical trends and is prepared to express views on social and ideological matters.	K_K01	3
dok_pol_i_pr_08	Is prepared to analyze specific social processes as well as political and legal institutions in terms of their ideological origins.	K_K02	3

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
c07	Demonstration methods	Screen presentation

		<i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points, charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>

7.	General information about the module	
Module name		Private international law
Module code		pr_pr_międz_07
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		<p>The curriculum of the module covers private international law in the strict sense. In addition to the general institutions of private international law such as characterization, renvoi, preliminary question, public policy clause, overriding mandatory provisions, evasion of law, change of applicable statute, application of the applicable law and related difficulties, the course also discusses conflict-of-law rules indicating the applicable law in matters of civil law, family law, and labor law. To the necessary extent, the course also addresses issues of international civil procedure (jurisdiction and the recognition and enforcement of foreign judgments) as well as matters related to the status of foreigners.</p> <p>The subject of analysis includes the conflict-of-law rules set out in the 2011 Act on Private International Law, in European law (Rome I and Rome II Regulations), and in selected conventions. The main teaching objective is to make students aware of the differences between substantive law and conflict-of-law rules and to help them grasp the principles of interpretation and application specific to private international law.</p> <p>Students should master the content of the above-mentioned regulations and the terminology characteristic of this field. Lectures should use real-life examples and references to both foreign and domestic case law. The use of visual schemes also facilitates understanding of the complex regulations of private international law. During the practical classes, students analyze case studies to learn the challenging art of categorizing situations involving a “foreign element” within the scope of relevant conflict-of-law norms. They also become familiar with tools related to the application of applicable law, such as characterization, adjustment, preliminary issue resolution, and develop legal reasoning, argumentation, decision-making, and justification skills.</p> <p>This course offers students the opportunity to recognize the diversity of solutions in various legal systems and teaches respect for legal differences found in other countries.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
cywil_p_04_1	Has knowledge of the content of the conflict of laws rules of the Polish Private International Law Act, EU regulations and selected international conventions.	K_W08	3	

cywil_p_04_2	Is familiar with the principles of interpretation and application of conflict of laws rules specific to private international law, the differences between substantive and conflict of laws and the terminology specific to this field.	K_W04	4
cywil_p_04_3	Knows how to find the correct conflict of laws regulation for a given life situation with an international element, taking into account the appropriate tools and methods.	K_U04	2
cywil_p_04_4	Is able to formulate arguments and decisions in the field of private international law and justify them, also participating in teamwork.	K_U11 K_U12	3 2
cywil_p_04_5	Is ready to recognise the diversity of legal solutions in the context of private international law, which teaches respect for the differences found in other countries.	K_K02	3
cywil_p_04_6	Is ready to develop international social projects within the field of private international law, and to think entrepreneurially in order to apply private international law regulations in his role as an arbitrator, negotiator or advisor.	K_K04	2

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
a05	Lecture methods / expository methods	Explanation/clarification <i>explication involving the derivation of a predetermined theorem from other, already known ones, in the number of steps specified by the person teaching the course</i>
b03	Problem-solving methods	Activating method – educational games <i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

7.	General information about the module	
Module name		Public procurement
Module code		K2_zam_pub 08
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		The aim of the module is to present the principles of spending public funds within the procedures of Public Procurement Law. Issues concerning the public procurement system are analyzed. The module presents the requirements related to preparing a public procurement procedure, including the principles of estimating the subject of the contract, as well as how to describe the subject of the contract and prepare the terms of reference. The modes of awarding public contracts and the conditions for their application are discussed. The student learns about the specifics of public procurement contracts. In addition, within the module, the student acquires knowledge about legal protection measures and control principles.

b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>	No
b03	Consulting the curriculum and the organization	Consulting the schedule	No

	of classes	<i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>	
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class</i>	No
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)
4.	Level of qualifications/degree	long-cycle studies
5.	Degree profile	general academic
6.	Mode of study	part-time

7.	General information about the module	
Module name		Roman law
Module code		pr_rzym_01
Number of the ECTS credits		7
Language of instruction		Polish
Purpose and description of the content of education		<p>The aim of the module is to acquaint the student with the conceptual and terminological framework of Roman law. Within the module, the student learns about various institutions of Roman law, their origins, evolution, and the historical and social mechanisms that influenced their formation and transformation. The student also acquires the ability to critically analyze legal texts characteristic of Roman law and, based on them, propose a solution to a simple legal problem.</p> <p>The module also aims to highlight the factors influencing specific legal solutions, including socio-economic conditions and ethical attitudes related to the creation and application of law. It demonstrates the relationships between institutions characteristic of Roman law and other legal systems, emphasizing its importance in the formation of the European legal tradition.</p> <p>Topics covered include the systematics of Roman law, sources of Roman law, the reception of Roman law, the Roman civil procedure, personal law, property law, the law of obligations, inheritance law, family law, and the Roman roots of modern civil law.</p>
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
pr_rzym_01	Has deep knowledge and understanding of the development and evolution of Roman law and its sources, as well as their significance for contemporary law.	K_W02	4	
pr_rzym_02	Has a deep knowledge of Roman legal thought and its influence on the formation of terminology related to specific legal institutions, as well as the development of the Roman legal system.	K_W03	3	
pr_rzym_03	Knows and understands the legal principles and institutions of the various branches of Roman law, as well as the interatcions between them.	K_W08	5	
pr_rzym_04	Recognizes, interprets, and analyzes the mechanisms and effects related to the applicability of individual Roman law regulations, as well as of the entire legal system.	K_U02	3	
pr_rzym_05	Assesses the history, development, and evolution of the Roman state and society in the context of their interactions with	K_U03	4	

	law, understands the surrounding reality, and is able to conduct analysis based on legal reasoning rules derived from Roman law.		
pr_rzym_06	Is aware of the impact of social and political phenomena on the shape of individual institutions of Roman law within its various branches.	K_K02	2

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b04	Problem-solving methods	Activating method – discussion / debate <i>an exchange of views supported by substantive arguments leading to a clash of different views, a compromise or the identification of common positions; it proceeds according to previously agreed-upon rules regarding the time, manner and turn-taking as well as the principles of civil discourse; a discussion is not a competition but aims at finding the best solutions or presenting different points of view; its varieties include brainstorming, Oxford-style debate, panel discussion, decision tree, conference discussion; a debate is an orderly dispute between supporters and opponents of a viewpoint, usually specialists in the field or pre-selected representatives of a group dealing with a common problem</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
c07	Demonstration methods	Screen presentation <i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points, charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>
e07	Practical methods	Simulation <i>an indirect method; imitating reality in order to gain experience approximating a real one; recreating a real-world situation so that its participant can acquire an experience close to the authentic one; work on "replacement" material</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching					
Code	Name	Number of hours	Assessment of the learning outcomes of the module	Learning outcomes of the module	Methods of conducting classes

7.	General information about the module	
Module name		Seminar - part I
Module code		sem_07
Number of the ECTS credits		2
Language of instruction		
Purpose and description of the content of education		<p>The aim of the module is to familiarize students with both the formal and substantive principles of preparing a master's thesis in a selected field of law, as well as to deepen their knowledge in the chosen research area. Upon completing the course, the student is capable of independently developing the acquired knowledge and refining their legal skills, demonstrating the ability to critically analyze legal provisions and case law. The course also fosters a mindset of lifelong learning by encouraging the continuous development and enhancement of competences and professional skills.</p> <p>During seminar classes, the student learns to identify, analyze, and solve academic problems using available literature and case law, and by applying various research methods. At the same time, the student acquires the skills necessary to find relevant literature, use it effectively, and document it properly in their thesis.</p>

7.	General information about the module	
Module name		SEminar - part III
Module code		sem_09
Number of the ECTS credits		4
Language of instruction		
Purpose and description of the content of education		The module aims to familiarize students with the formal and substantive principles of preparing a master's thesis in a selected field of law, as well as to deepen knowledge in the scope of the selected research topic. After completing the course, the student is able to independently develop the acquired knowledge and improve legal skills, demonstrating the ability to critically analyze legal regulations and case law. The subject also shapes the attitude of continuous learning, motivating to systematically supplement and improve the acquired competences and professional skills. During the seminar classes, the student learns to recognize, analyze and solve scientific problems using available literature and case law and applying various research methods. At the same time, the student learns how to find the right literature, how to use it and how to document this fact in the work itself.

7.	General information about the module	
Module name		Seminar - part IV
Module code		sem_10
Number of the ECTS credits		12
Language of instruction		
Purpose and description of the content of education		The module is designed to familiarize students with the formal and substantive rules governing the preparation of a master's thesis in a selected field of law, while also deepening their understanding of their chosen research topic. Upon completion of the course, students will be equipped to independently develop the knowledge acquired and enhance their legal skills, demonstrating a critical analysis of legal provisions and case law. The subject encourages a commitment to continuous learning, motivating students to systematically augment their competencies and professional skills. During seminar sessions, students will learn to identify, analyze, and resolve scientific problems by utilizing available literature and case law, while applying various research methods. Additionally, students will gain proficiency in locating appropriate literature, utilizing it effectively, and documenting their findings within the thesis itself.

7.	General information about the module	
Module name		Social security
Module code		K2_ ubezp_spol 08
Number of the ECTS credits		4
Language of instruction		Polish
Purpose and description of the content of education		The aim of the module is to familiarize the Student with the basic principles and institutions of social security law. The Student should become acquainted with the social insurance system in Poland, in particular the rules of insurance coverage, the scope of benefits, and the procedure for granting them. During the course, topics such as retirement insurance, disability pensions, sickness insurance, accident insurance, and additionally health insurance are discussed. Particular emphasis is placed on the analysis of the provisions of the Act on the Social Insurance System and other selected legal acts within the above-mentioned branch of law. The Student acquires the ability to practically apply the provisions of social security law, including identifying the rights and obligations of the insured and contribution payers. The subject is tailored to the needs of a law student.

7.	General information about the module	
Module name		Tax law
Module code		pr_pod_08
Number of the ECTS credits		6
Language of instruction		Polish
Purpose and description of the content of education		The aim of the module is for students to acquire knowledge, skills, and competences in understanding and applying tax law norms, both in the national and international context. As part of the module, the student becomes familiar with the fundamental issues of Polish and European tax law, particularly the basic concepts and institutions used in tax law and banking law. The course introduces the sources of tax law, the structural elements of a tax, and addresses topics related to both general and specific tax law.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
finan_p_09_1	Knows the organisation, competences and procedures of the tax apparatus of the Republic of Poland and the organisation of the tax administration.	K_W06	2	
finan_p_09_2	Has knowledge of the legal institutions and constructions related to the issues of Polish and international tax law.	K_W08	1	
finan_p_09_3	Is familiar with the principles of legal reasoning and logic and the interpretation of tax law regulations.	K_W04	4	
finan_p_09_4	Is able to perceive, interpret and prognose social and economic phenomena taking into account the context of their connection with tax law.	K_U02	3	
finan_p_09_5	Is prepared to identify and assess the individual and collective interests of the various participants in society and the public interest in the field of tax law regulation, as well as their interactions.	K_K02	1	
finan_p_09_6	Knows and understands in depth the tax regulations relating to running a business, including their own professional activity, enabling them to plan their own development and create and develop various forms of entrepreneurship.	K_W12	4	

9.	Methods of conducting classes		
Code	Category	Name (description)	
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a</i>	

		<i>passive reception of the information provided</i>
b03	Problem-solving methods	<p>Activating method – educational games</p> <p><i>learning content in the guise of a rule- and/or principle-based game; conducted in a deliberately arranged situation based on the description of relevant facts and processes; learners compete with one another within the framework of rules laid down by the academic teacher; varieties include simulation games – involving a simulation of real situations; decision games – based on the decision-making process and the recognition of the consequences of the decisions made (e.g., a decision tree); psychological games – increasing the emotional-volitional component of the participants' attitudes</i></p>
b06	Problem-solving methods	<p>Activating method – staged drama/drama</p> <p><i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i></p>
b07	Problem-solving methods	<p>Activating methods: a case study</p> <p><i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i></p>
b08	Problem-solving methods	<p>Activating method – peer learning</p> <p><i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i></p>
b09	Problem-solving methods	<p>Activating method – flipped classroom</p> <p><i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i></p>
d02	Programmed learning methods	<p>Working with a programmed textbook</p> <p><i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i></p>
f02	Methods of self-learning	<p>Individual work with a text</p> <p><i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i></p>

c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.

1.	Field of study	Law
2.	Faculty	Faculty of Law and Administration
3.	Academic year of entry	2025/2026 (winter term)
4.	Level of qualifications/degree	long-cycle studies
5.	Degree profile	general academic
6.	Mode of study	part-time

7.	General information about the module	
Module name		Theory and philosophy law
Module code		tif_pr_09
Number of the ECTS credits		5
Language of instruction		Polish
Purpose and description of the content of education		The aim of the module is to supplement and expand the student's knowledge in the field of legal theory and philosophy of law, particularly concerning the philosophy of legal interpretation. Throughout the course, the student becomes acquainted with concepts related to the theory of interpretation, interpretative directives, and interpretive strategies, including the evolution of views on these issues. These topics are presented within a broad philosophical and legal context. The student also gains knowledge of the theoretical and philosophical tools available to a lawyer when addressing interpretative situations. Additionally, the student is expected to acquire the ability to apply philosophical and theoretical legal knowledge in analyzing legal texts, particularly in discerning the legislator's intent. This includes the ability to identify problems arising in the course of interpretation, determine acceptable interpretive options, and present convincing arguments grounded in legal theory and philosophy. The outcome of the course should be the ability to engage in legal discourse, including philosophical and theoretical-legal discourse, on the interpretation of law from both theoretical and practical perspectives.
List of modules that must be completed before starting this module (if necessary)		not applicable

8.	Learning outcomes of the module			
Code	Description	Learning outcomes of the programme	Level of competenc (scale 1-5)	
teori_p_02_1	Knows and understands the basic concepts in the field of philosophy and theory of law, including the philosophy of legal interpretation.	K_W03	4	
teori_p_02_2	Knows the theories of interpretation, interpretation strategies and interpretation directives.	K_W04	4	
teori_p_02_3	Knows legal constructions in the field of interpretation of law developed in individual branches of law, including differences between them.	K_W08	1	
teori_p_02_4	Describes international standards in the field of law interpretation, including European and international interpretation theories.	K_W13	4	
teori_p_02_5	Analyzes the unit resolution referring to a given state of fact in the scope of interpretation directives used, interpretation strategies and interpretation theories.	K_U05	1	
teori_p_02_6	By ownself suggests how to solve a specific interpretative problem based on philosophical and legal and theoretical-legal knowledge.	K_U05	2	

teori_p_02_7	Makes a critical analyze of interpretative technique used in practice based on dogmatic literature, legal acts and case law.	K_U07	5
teori_p_02_8	Makes own decision regarding the interpretation of the law along with its justification, also by directing the team and participating in one's work.	K_U12	4

9. Methods of conducting classes		
Code	Category	Name (description)
a01	Lecture methods / expository methods	Formal lecture/ course-related lecture <i>a systematic course of study involving a synthetic presentation of an academic discipline; its implementation assumes a passive reception of the information provided</i>
b06	Problem-solving methods	Activating method – staged drama/drama <i>experiential learning; solving a problem by acting out a role; a.k.a. a role-playing method; role-players interpret their roles in an individual way; the identification with the role is achieved through the activation of the senses, imagination and speech, the stimulation of gesture and movement, etc.; the aim of drama is to experience situations, problems and events mediated by the role; staged drama is a role-playing method enriched with props and stage scenery illustrating a theme</i>
b07	Problem-solving methods	Activating methods: a case study <i>a comprehensive description of a phenomenon connected with the selected discipline; reflecting the reality, presenting the 'what', 'where' and 'how' of the phenomenon, i.e., all of its key aspects to be discussed in class; used as a reproduction, presentation, discussion or diagnosis of factors that shape the phenomenon or interact with it; an in-depth qualitative analysis and evaluation of a selected phenomenon</i>
b08	Problem-solving methods	Activating method – peer learning <i>learning through the exchange of knowledge in a group/team/pair of students, i.e., in the so-called learning cell; a kind of mutual learning; an approach focused on student activity under the guidance of the person teaching the course; a learning situation where students with a similar level of experience learn from one another</i>
b09	Problem-solving methods	Activating method – flipped classroom <i>anticipatory learning; work in class is based on previously studied material indicated by the person teaching the course; preparation outside the classroom serves the purpose of getting familiar with the issues whose knowledge is necessary for participating in the in-class discussion and the training in the related practical skills; the activity is based on the work of students under the guidance of the person teaching the course</i>
c07	Demonstration methods	Screen presentation <i>a presentation of synthetic image content using computer graphics, e.g., a series of slides or other multimedia forms, usually accompanied by a commentary; typical components of a screen presentation include text organized into bulleted points, charts, images and animations, sometimes sound effects or music; a multimedia illustration of course content presented in the form of a projected image</i>
d02	Programmed learning methods	Working with a programmed textbook <i>working with a textbook containing instructional material covering part of or the entire curriculum of the module as well as a formula for studying the content; includes working with a subject textbook, an atlas, a catalogue, a problem book, etc.</i>
f02	Methods of self-learning	Individual work with a text <i>searching for and acquiring new information using textbooks and other written sources (including their digital versions); searching for texts, selecting fragments for analysis/interpretation, using other texts to solve a problem related to the studied issue</i>

10. Forms of teaching					
Code	Name	Number of hours	Assessment of the learning outcomes of the module	Learning outcomes of the module	Methods of conducting classes
tif_pr_01	lecture	20	exam	teori_p_02_1, teori_p_02_2, teori_p_02_3, teori_p_02_6, teori_p_02_7	a01
tif_pr_02	practical classes	14	course work	teori_p_02_4, teori_p_02_5, teori_p_02_6, teori_p_02_7, teori_p_02_8	b06, b07, b08, b09, c07, d02, f02

11. The student's work, apart from participation in classes, includes in particular:			
Code	Category	Name (description)	Is it part of the BUNA?
a01	Preparation for classes	Search for materials and review activities necessary for class participation <i>reviewing literature, documentation, tools and materials as well as the specifics of the syllabus and the range of activities indicated in it as required for full participation in classes</i>	No
a02	Preparation for classes	Literature reading / analysis of source materials <i>reading the literature indicated in the syllabus; reviewing, organizing, analyzing and selecting source materials to be used in class</i>	No
a03	Preparation for classes	Developing practical skills <i>activities involving the repetition, refinement and consolidation of practical skills, including those developed during previous classes or new skills necessary for the implementation of subsequent elements of the curriculum (as preparation for class participation)</i>	No
a04	Preparation for classes	Consulting materials complementary to those indicated in the syllabus <i>agreeing on materials complementary to those indicated in the syllabus, supporting the implementation of tasks resulting from or necessary for class participation</i>	Yes
b01	Consulting the curriculum and the organization of classes	Getting acquainted with the syllabus content <i>reading through the syllabus and getting acquainted with its content</i>	No
b02	Consulting the curriculum and the organization of classes	Verification / adjustment / discussion of syllabus provisions <i>consulting the content of the syllabus, possibly in the presence of the year tutor or members of the class group, and, if necessary, reassessing the provisions concerning special conditions for class participation, e.g., space and time requirements, technical and other requirements, including conditions for participation in classes outside the walls of the university, classes organized in blocks, organized online, etc.</i>	No
b03	Consulting the curriculum and the organization of classes	Consulting the schedule <i>getting acquainted with the class schedule, possibly in the presence of the year tutor, in order to optimize participation in classes, including those supplementary to the core subjects listed in the pursued study programme</i>	No
c01	Preparation for verification of learning outcomes	Determining the stages of task implementation contributing to the verification of learning outcomes <i>devising a task implementation strategy embracing the division of content, the range of activities, implementation time and/or the method(s) of obtaining the necessary materials and tools, etc.</i>	No
c02	Preparation for verification of learning outcomes	Studying the literature used in and the materials produced in class <i>exploring the studied content, inquiring, considering, assimilating, interpreting it, or organizing</i>	No

		<i>knowledge obtained from the literature, documentation, instructions, scenarios, etc., used in class as well as from the notes or other materials/artifacts made in class</i>	
c03	Preparation for verification of learning outcomes	Implementation of an individual or group assignment necessary for course/phase/ examination completion <i>a set of activities aimed at performing an assigned task, to be executed out of class, as an obligatory phase/element of the verification of the learning outcomes assigned to the course</i>	No
d01	Consulting the results of the verification of learning outcomes	Analysis of the corrective feedback provided by the academic teacher on the results of the verification of learning outcomes <i>reading through the academic teacher's comments, assessments and opinions on the implementation of the task aimed at checking the level of the achieved learning outcomes</i>	Yes
d02	Consulting the results of the verification of learning outcomes	Development of a corrective action plan as well as supplementary/corrective tasks <i>reviewing and selecting tasks and activities enabling the elimination of errors indicated by the academic teacher, their verification or correction resulting in completing the task with at least the minimum passing grade</i>	Yes
e03	Activities complementary to the classes	Participation in non-obligatory teaching, research or organizational grants intensifying the achievement of the assumed learning outcomes <i>research, artistic, social and other activities not indicated in the curriculum, undertaken on the student's own initiative as a way of supplementing, enriching or extending the content and activities indicated in the module curriculum, intensifying the achievement of learning outcomes</i>	No

Information on the details of the module implementation in a given academic year can be found in the syllabus available in the USOS system: <https://usosweb.us.edu.pl>.
